

## Northern Region Young Persons' Malignant Disease Registry Patient Opt Out Request Form

Version 2.2 (14/02/2025)

Cancer registration information is extremely valuable for research. It tells us whether more patients are being cured and helps us to understand why people get cancer. Inclusion in the Northern Region Children & Young Persons' Malignant Disease Registry (NRYPMDR) is however optional and you have a right to object to your personal data being recorded. If you would like to opt out of the registry you will need to apply in writing by completing this form and sending it to the address listed on page 2. If you are uncertain about opting out and would like more advice on the matter please contact the NYPMDR or your treating consultant at the Royal Victoria Infirmary, Newcastle-upon-Tyne (contact details listed on page 2).

There are two options if you decide to opt out. We can delete everything we have recorded about you or we can delete everything except your NHS number. If you decide you would like us to delete everything we will remove all of your information we have recorded in the registry. We will keep a copy of this form as evidence that you have applied to opt out.

Retaining your NHS number and the form will avoid us accidentally re-registering you in the future from medical data which the registry may receive.
