

Playmobil Motorbike

As well as developing two-handed play this game gives the helper hand practice in:

Thumb/finger grasping

Whole hand grasping

Holding

Reaching

Releasing

Help your child to build this motorbike by showing him/her where the different pieces go.

Encourage your child to pick the pieces up and try to put them together using both hands. If he/she finds the smallest pieces too difficult, help your child with those.

When the bike has been built, your child can hold the man on top and see how far he/she can push the bike out to each side and in front of him/her. Encourage him/her to use his/her helper hand to do this.

We hope your child will have lots of fun with this motorbike.

You can use other Playmobil sets in a similar way.
