ELIM-I Practitioner Guidance

This resource features an illustration of a woman with blue hair and an orange top interacting with a young boy with blonde hair. They are sitting at a table with colorful rings and a wooden stick. The background is a soft, abstract landscape with pink and purple clouds.

Supporting your child's language

Three smaller booklets are shown, each with the title "Supporting your child's language" and an illustration of a woman and child. The titles are: "Supporting your child's language", "Supporting your child's language", and "Supporting your child's language".

Finding the right 'together time' for your family

Three smaller booklets are shown, each with the title "Finding the right 'together time' for your family" and an illustration of a woman and child. The titles are: "Finding the right 'together time' for your family", "Finding the right 'together time' for your family", and "Finding the right 'together time' for your family".

At toddler group

Two smaller booklets are shown, each with the title "At toddler group" and an illustration of a woman and child. The titles are: "At toddler group" and "At toddler group".

Sharing books

One smaller booklet is shown with the title "Sharing books" and an illustration of a woman and child. The title is: "Sharing books".

- c. The Intervention – a Self-directed approach
- d. The Intervention – a Coaching approach and Signposting

Part 5: Accessing the resources

Aim of the intervention

- The ELIM-Intervention aims to improve the language and communication development of children aged 2- 3; 06 years, and to support parents to interact and communicate more effectively with their child to support SLC development
- It is an approach to SLC development support that is:
 - equitable
 - consistent
 - Feasible
- And draws on theories of:
 - Shared decision-making
 - Engagement & partnership
 - Strengths-based approaches

Responsive Contingent Interaction (RCI)

- The focus of intervention is on increasing the frequency with which children experience Responsive Contingent Interaction (RCI)
- Language is learned through interaction, the most important interaction being that between parent-child and educator-child
- Language is easier for children to learn when it occurs in interactions with certain qualities or characteristics
- These *characteristics* of interactions and their *consistency*, are more important for language learning than just the *amount* of language a child hears

How would you describe responsive contingent interaction to a parent to help them understand?

Responsive Contingent Interaction (RCI)

A responsive parent is not directive of their child's attention but follows their child's lead, watching and listening carefully for communication. They respond to their child's communicative attempts with language relating to the child's focus of attention.

They are also responsive to the child's developmental level so the language they use is in the child's Zone of Proximal Development – one step ahead of the child's development

Responsive Contingent Interaction (RCI)

In the ELIM-Intervention we:

- Aim to increase parent/caregivers use of RCI
- Focus on characteristics and qualities of interaction which are important for children aged 2 – 3 years
- We have identified 9 responsive-contingent characteristics of interactions – we call these 'Super Communicator' tips
- To help parents to understand the idea we talk about being 'Super Communicators'

HOW TO BE A
SUPER
COMMUNICATOR

Responsive Contingent Interaction (RCI)

In the ELIM-Intervention we:

- Seeing RCI is easier than describing RCI!
- In collaboration with the BBC's Tiny Happy People, we have developed 'Super Communicator' videos to help demonstrate these responsive-contingent interactions
- Each of the 9 tips has its own video and these can be viewed on the BBC's Tiny Happy People website

Responsive-contingent interaction in ELIM-Intervention

Get down to your child's level

When you get down to your child's level, they will be able to see what you are looking at, and hear your sentences more easily, and you will be sure that you are talking about what interests them the most.

Listen, watch and respond

When you listen, watch and respond to your child's communication, it helps keep the conversation going about something your child is interested in. The more turns you and your child take, the more words and sentences your child will learn.

Have fun and use an interesting voice

When you get down to your child's level, they will be able to see what you are looking at, and hear your sentences more easily, and you will be sure that you are talking about what interests them the most.

Follow your child's lead

When you follow your child's lead and interests, you can model the language they need to talk about what interests them. This will help them learn words more quickly.

Copy what they say and add a word

When you copy what your child says and add a word, it helps your child know they have shared their ideas with you and helps them learn how to make their sentences longer. If your child says 'car', you can reply with 'big car', 'fast car' or 'red car'.

Pause and wait for your child

When you pause and wait for your child to show you what they are interested in, it gives them time to start communicating or respond to your actions or words. Your child may point, look at an object or say a word. The words you say will be all about what has interested them, making it easier for them to learn.

Use fewer questions

Questions can put pressure on a child to talk when they may not have the language to answer. To help your child, describe what is happening and talk about what you are doing as you and your child do it. When you describe what your child is doing or looking at, you are modelling the language they need to talk about what interests them. This will help them learn words more quickly.

Describe what your child is doing

When you describe what your child is doing or looking at, you are modelling the language they need to talk about what interests them. This will help them learn words more quickly.

Open questions

When you do ask questions try to keep them 'open'. That means 'what', 'why', 'where', 'who' and 'how' questions that encourage more than just Yes or No answers. When you ask open questions, it helps open up the conversation, allowing it to continue with more turns and follow the child's interests.

- Each tip depicts parents following their child's lead, watching and listening carefully for communication and responding with language relating to the child's focus of attention

‘Together Time’

- We aim to help parents to use Super Communicator tips in their daily routine
- The resources encourage families to find a ‘together time’ in which they can try out and practice the tip(s) they choose
- ‘Together time’ is a time when parents feel most in tune with their child
- Importantly, this may be one of their daily routines
- No need to ‘fit in’ an extra intervention behaviour or activity but instead make their everyday interactions more conscious and meaningful

Finding the right ‘together time’ for your family

Part 5: Accessing the resources

*also onward referral if meet local criteria

— ➔ Optional step

*also onward referral if meet local criteria

— ➔ Optional step

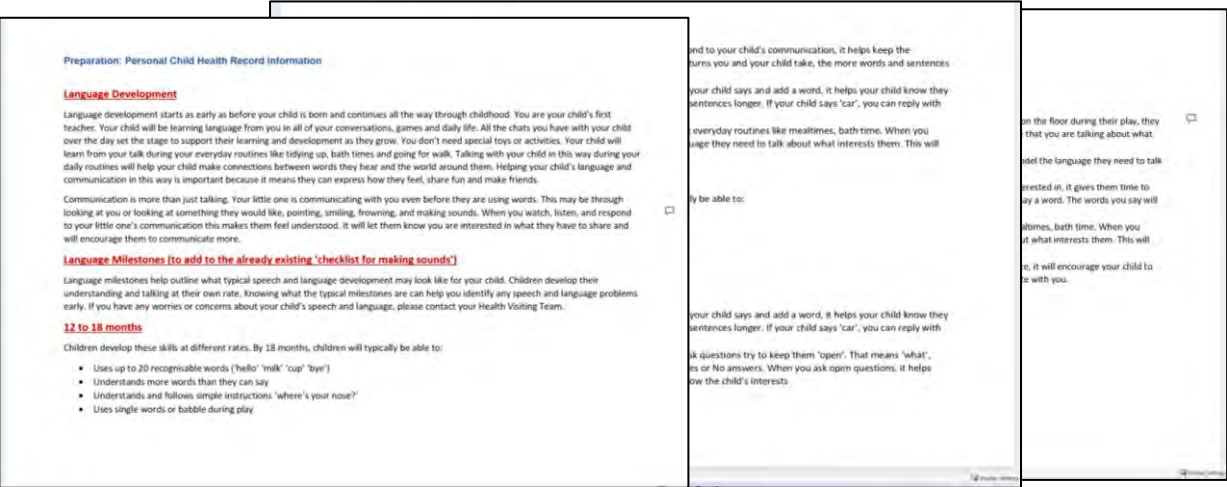

Aims

- Support parents to
 - have clear expectations of the 2 – 2 ½ review, its focus and benefits
 - feel prepared to complete the ELIM tool and understand its purpose
 - feel ready for shared goal setting and to see themselves as equal partners in decision making
 - feel ready to ask questions and voice any concerns

Resources

Red Book information

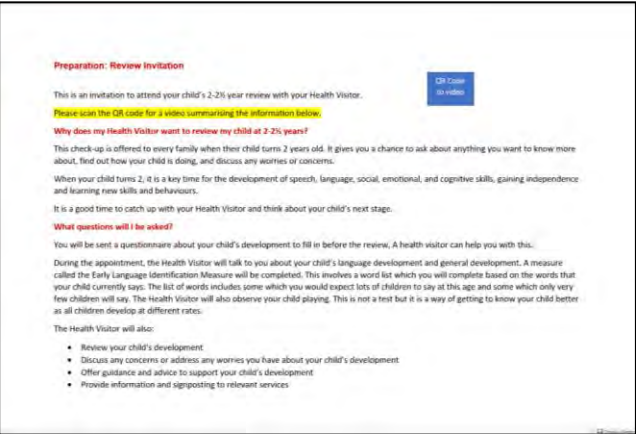

Additional text which could be added to the red book

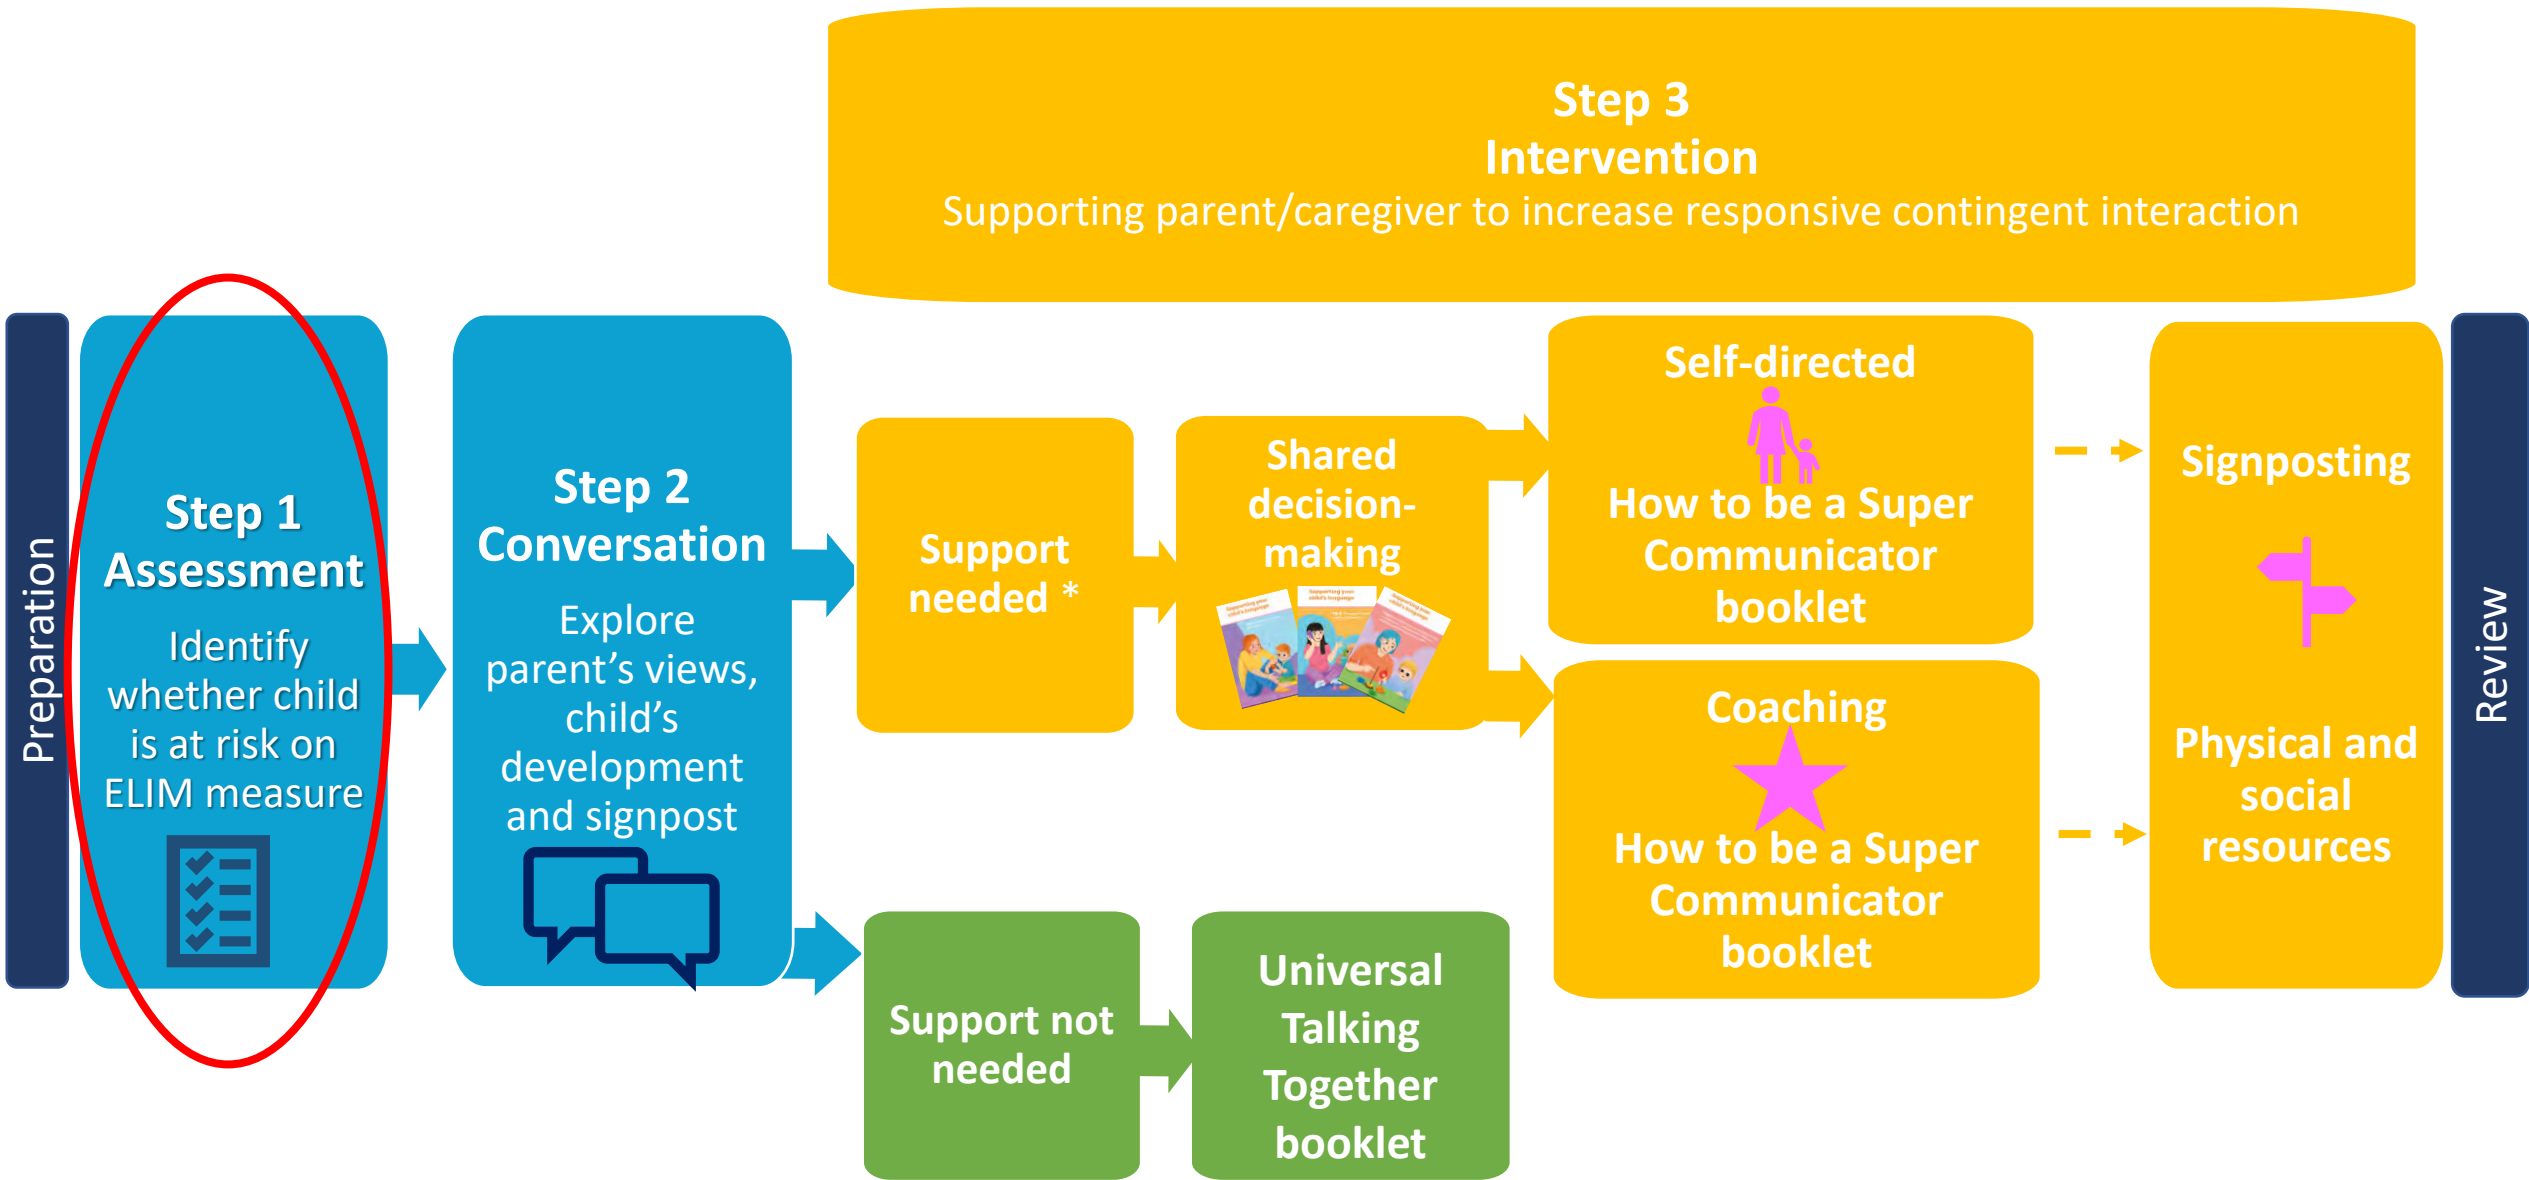

Invitation to the review

Text which could be provided in the review invitation

Includes prompts to support the parent to feel ready, know what to expect and prepare.

*also onward referral if meet local criteria

— ➔ Optional step

Aims

- identify children aged 2-2 ½ years who may need support with their speech language and communication development using:
 - 50-word list
 - Practitioner observation

Resources

Public Health England

Early language identification measure and intervention

Guidance handbook

To support children's speech, language, and communication development as part of the 2 to 2½ year review in England

Department of Health & Social Care

Department for Education

The ELIM word list

Please tick which of the following words you have heard your child say:

1. Mummy/mum	11. (Aero)plane	21. Towel	31. Fit (can have different meanings)	41. Wet
2. Bye/bye bye	12. Car	22. Bed	32. Like	42. After
3. No	13. Book	23. Settee/sofa	33. Rip/tear	43. Day
4. Ball	14. Milk	24. School	34. Shake	
5. Juice	15. Hat	25. Friend	35. Think	
6. Ouch/ow	16. Shoe	26. Person	36. Gentle	
7. Cat	17. Leg	27. Hello/hi	37. Fast	
8. Thank you	18. Pillow	28. Shopping	38. Happy	
9. Cold	19. Rubbish	29. Carry	39. Last	
10. Hug/cuddle	20. Plate	30. Finish	40. Tiny	
Column Total	Column Total	Column Total	Column Total	

ELIM word list

Total number of words the child says	17 or under	18
	/50	

The ELIM observation

The ELIM process also includes recording of a specific set of observations. Use this table to record what **you have seen** during the 2- 2½ year review, rather than what the parent/carer reports. Observations should be carried out during the review with this section completed towards the end of the review. You may decide to let the child have some toys to play with while carrying out the review with the parent/carer, to help you observe what the child does and how they interact with their parent/carer. Below the ELIM observation checklist are some guidance notes for the observation questions. Please make sure you are familiar with them before completing the observation:

Please tick which of the following behaviours you (the practitioner) observed or heard from the child when speaking with his/her parent/carer during the 2- 2½ year review.

	Yes	No
1 Observed communicative intent (child means to communicate something verbally to parent/carer)		
2 Speech mostly intelligible to parent/carers		
3 Observed putting words together (mummy up, more dinner)		
4 Do the parent/carer and child take turns when communicating?		
5 Does the child understand what is being said to him/her when their parent/carer asks them something which is NOT obvious from the context?		
6 Attention: (please circle which one you observe the child doing)		
Fleeting (flits from one thing to another)	Single channelled (attention can't easily be shifted)	Accepts adult direction when playing

Scoring the ELIM observation

For questions 1-5 place a tick next to each observation to indicate whether you have or have not observed that behaviour. **For question 6** please circle one of the three types of attention. If you circle 'Fleeting' you should explore this further in the Step 2 conversation

ELIM Observation	Please tick	
	Concern	No concern

Actions

- Complete the 50-word list with the parent:
 - tick off the words the parent has heard the child say
 - score: tick whether the total number is '17 or under' or '18 or over'
- Complete the observation section:
 - you will observe the child's communication throughout the whole review, but you may also carry out specific observations to complete this should you need to
 - tick 'Yes' or 'No' against each observation and circle the type of attention you observe
 - score: tick 'Concern' if you **have not** observed ALL of the behaviours indicated, and tick 'No concern' if you **have** observed all behaviours indicated.
 - Note: 'fleeting' attention is considered as 'not observed' (i.e., would score '0')

You might say.....(word list)

'early words children use can indicate how their language is developing...these are some words children might use at this age...some of them many children will say (for example, 'mama') and some of them only a few children will say (for example 'gentle')...this list is designed to pick up a range of different words'

'we don't expect children to be saying all of these words - this is a range of words to try to help us understand the range of individual differences in how children learn words and in what order.'

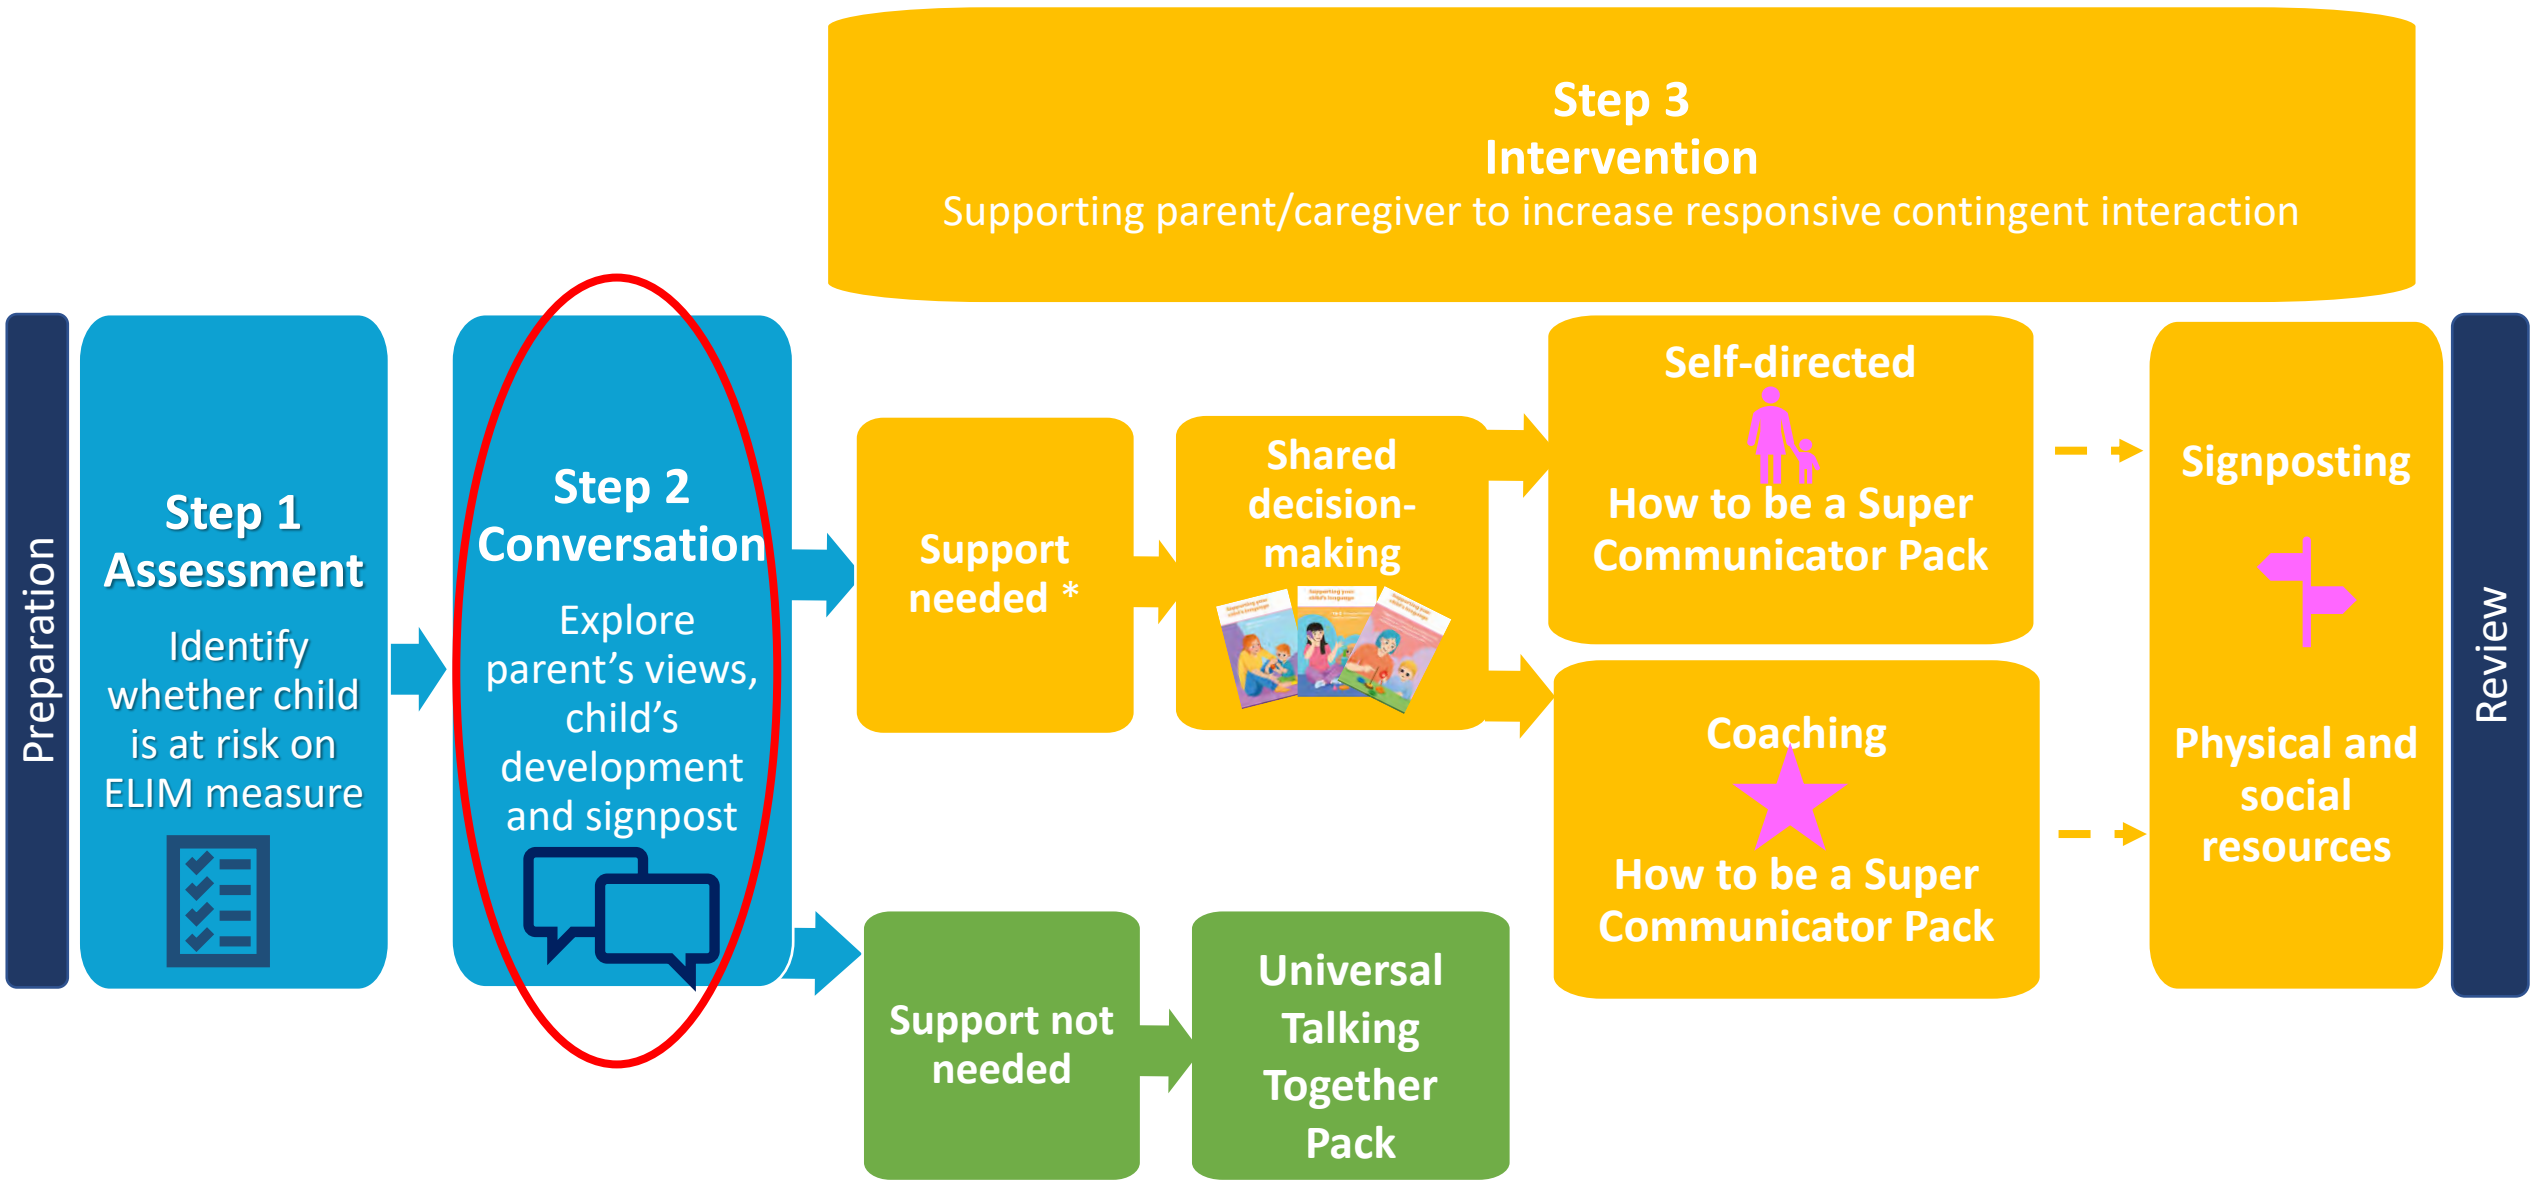

'has [child's name] said any words yet? ...what was their first word?'

You might say.....(word list)

'Let's go through them and check them off if you have heard [xxxx] say the words – they don't have to be saying them perfectly clearly – so they might say doo instead of shoe or tat instead of cat – but if you feel you have heard them make a good try at saying the word then we can check it off.'

'have you heard [child's name] say any of these words?...what about these words?'

*also onward referral if meet local criteria

— ➔ Optional step

Aims

- ensure parents are offered the space and time to explore and raise any concerns
- enable practitioner to gain deeper understanding of
 - the support and community resources available to the family
 - the languages spoken in the home
 - the barriers and enablers in place in the family to using responsive interaction
- build trust with the family
- model responsive interaction

Actions

- Explore the key topics
 - Parent/carer's specific concerns
 - Patterns of languages child hears
 - Any concerns about behaviour
 - Barriers and enablers to responsive interaction
- Model responsive behaviour to increase trust and partnership

Resources

ELIM-I Conversation Topics

A reminder list of topics from Step 2 in ELIM-I Handbook which are recommended for exploration with parents

Includes a reminder to model floor play and responsive contingent interaction with the child & encourage parent to join in

Step 2 Conversation

Step 2. Conversation: further exploration and signposting

This resource is a reminder of the areas to make sure to cover in conversations with the family when conducting the review

You will talk about lots of these whilst completing the ELIM-I and the ASQ and in your wider conversation about the family and child

This resource can be used either before the visit as a refresher of the areas which need to be covered and/or during the visit for the practitioner to check back that nothing has been missed.

Further exploration and signposting

1. How do you feel about how your child speaks when compared to other children of the same age?
2. Does your child understand what people say to them?
3. Is your child able to find 2 objects when you ask them (for example, Show me the teddy and the ball)
4. Does your child ask simple questions ("Where ball?" "What Daddy doing?" "What colour?")?
5. Can you understand what he/she is saying? How about people who are less familiar with him/her?
6. Is your child able to talk to you about something they are interested in?
7. Can you remember when your child was first able to walk independently? *(Physical movement and language development can sometimes be connected.)*
8. What sort of temperament does your child have? Are their times when it is tricky to manage their behaviour? *(Two-year olds can sometimes be challenging in terms of their behaviour.)*
9. Does anyone in your family have a speech and language difficulty or difficulties learning to read? How are they related to the child? *We also know that speech and language difficulties can run in families, and this may be important in terms of longer term difficulties. Primarily we consider first degree relatives (father/mother/brother/sister) but other family members may also be important.*

At this point it is also recommended that you spend some time playing with the child and begin to model responsive communication with them. You should not draw attention to the fact you are doing this but should join in with playing and entertaining the child with the parent/carer. Encouraging the parent/carer to also get involved could also bring insights regarding the barriers and enablers.

the child is exposed

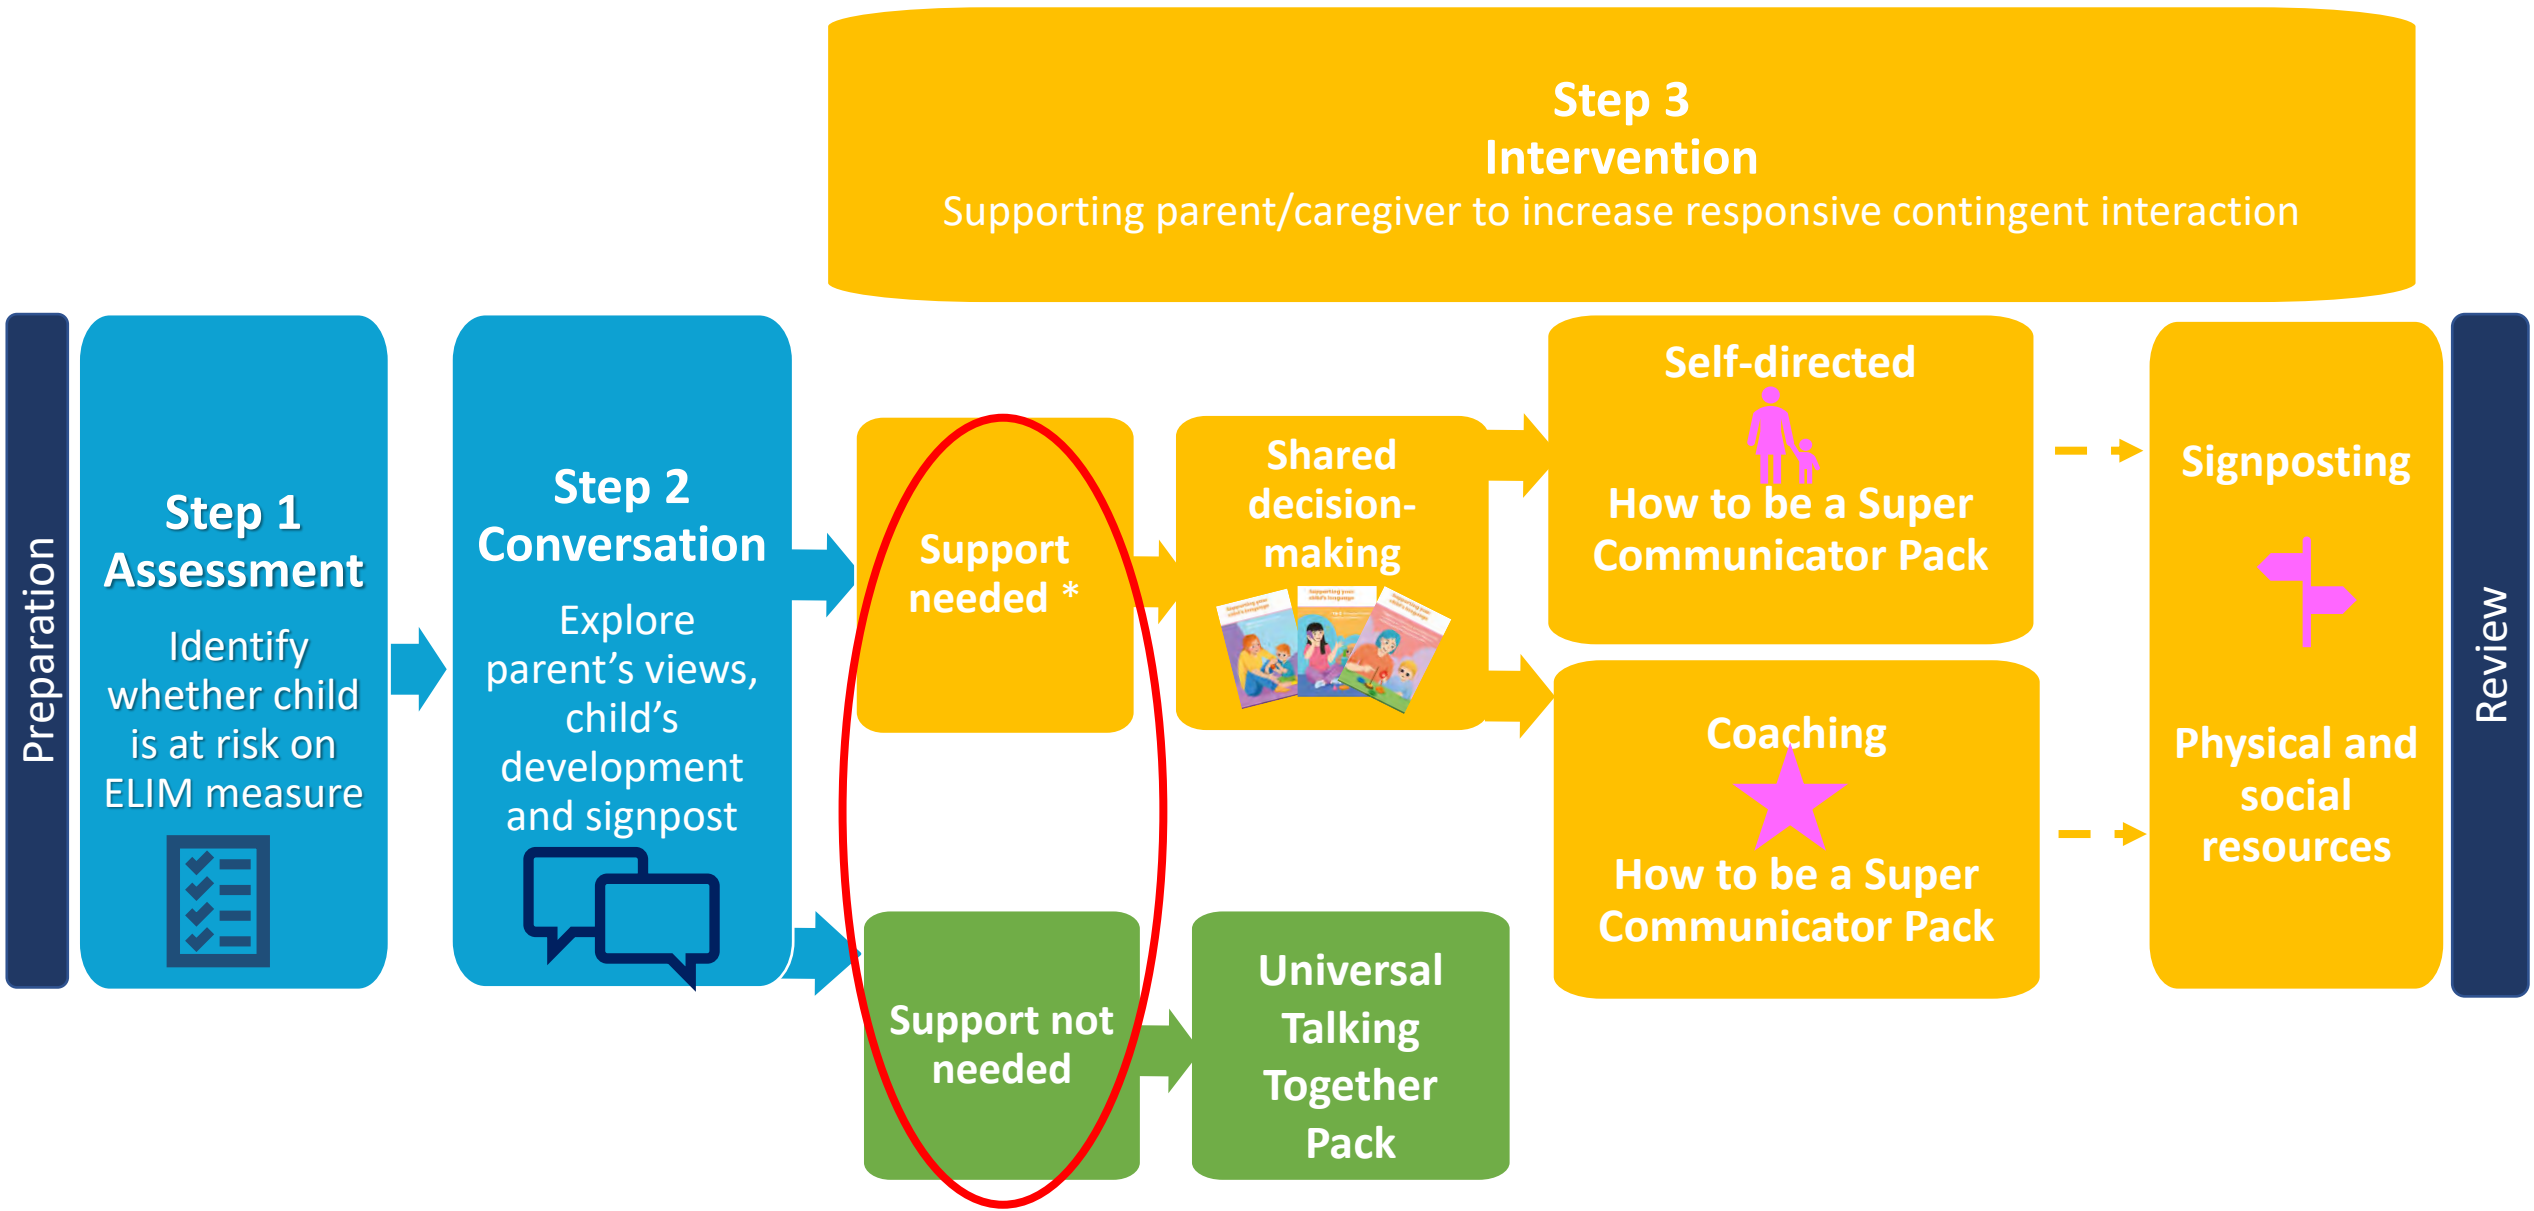

Make sure you understand the family's barriers and enablers to supporting their child's language development

13. Which activities and games does your child like the best? Which do you enjoy doing with them the most?
14. Which activities outside the home have you enjoyed with your child this week? For example, going to the park, to the shops?
15. When is your child at their most chatty? Which times of the day and/ or activities in the day are the ones when you hear the most talk?
16. Does your child attend any nursery sessions? Would you like them to? What are the barriers to attendance?
17. Do you attend any playgroups with your child? Would you like to? What are the barriers to attendance?
18. Do you use a book or toy library? Would you like to? What are the barriers to using these resources?
19. Where do you get your support and help if you feel you need it?

Together
booklet

- ensure all families are provided with accessible evidence-based guidance on child language development and enriching home learning environments
- ensure all children can reach their potential in terms of speech and language
- provide a safety net for any children missed by ELIM-I or for children whose SLCN may emerge later

Resources

Universal
Talking
Together
booklet

The booklet includes information about:

- Why language is important
- How to be a Super Communicator with a QR code to Tiny Happy People videos
- 9 super communicator tips with QR codes linked to videos for each on THP
- Useful resources (BBC's Tiny Happy People and Better Health Start for Life Campaign)
- Finding the right 'together time'
- Summary of the 9 tips

Why is language

- ★ Your child is learning new brain connections faster
- ★ Language development is born and continues all their life
- ★ You are your child's first language from you in all daily life.
- ★ All the little chats you have the stage to support their grow.
- ★ You don't need special toys to learn from your talk during tidying up, bath times or
- ★ Helping your child's language way is important because they feel, share fun and
- ★ Your child's language helps through childhood.

How to be a Super Communicator

- ★ Your child's language helps set their path for learning right through childhood.
- ★ Language and communication support your child to understand the world around them and interact with others.
- ★ Being a 'Super Communicator' means using simple words and sentences.

There are lots of ways to be a 'Super Communicator'. Follow the tips on the next page. Try to do them at different times of the day, during everyday routines.

Scan the QR code to watch some of the tips they are helping their child to learn.

BBC Tiny Happy People

1

Super Communicator

Get down to your child's level

When you get down to your child's level, you will be able to see what they are doing and hear your sentences more clearly. They will be sure that you are interested in what they are doing.

Follow your child's lead

When you follow your child's interests, you can model the language they need to talk about what they are doing. This will help them learn words.

Pause and wait for your child to respond

When you pause and wait, you show your child that you are interested in what they are doing. It gives them time to start communicating. You can look at an object or say a word. This will be all about what they are doing. Making it easier for them to talk.

Describe what your child is doing

When you describe what your child is doing or looking at, you are modelling the language they can use to talk about what interests them. This will help them learn words more quickly.

BBC Tiny Happy People

4

Listen, watch and respond

When you listen, watch and respond to your child's communication, it helps keep the conversation going about something your child is interested in. The more turns you and your child take, the more words and sentences your child will learn.

BBC Tiny Happy People

Copy what they say and add a word

When you copy what your child says and add a word, it helps your child know that you are listening and learn how to make their sentence. If your child says 'car', you can reply 'car', 'fast car' or 'red car'.

BBC Tiny Happy People

Ask fewer questions

Questions can put pressure on a child when they may not have the long answer. To help your child, describe what is happening and talk about what they are doing as you and your child do it.

Ask open questions

When you do ask questions, try to ask 'open' questions. That means 'what', 'why', 'who' and 'how' questions that need more than just 'Yes' or 'No' answers. Ask open questions, it helps open up conversation, allowing it to continue. More turns and follow the child's lead.

Have fun and use an interesting voice

When you show you are having fun, it will encourage your child to focus and listen to what you are saying. Having fun together will encourage your child to communicate with you.

Resources

BBC Tiny Happy People

The website includes activities, short videos and articles with helpful tips and advice to support your child's communication. The QR code will take you to the website. Almost any daily activity is a chance to support their language development. Almost any daily activity is a chance to have fun with your child.

NHS Start for life

The website includes tips, games and activities to help your child to support their language and literacy development.

Some people find it helps to choose a time of day to practise the Super Communicator tips. Think about when might be your best 'Together Time', this is when you feel you can really tune in to your child. Have a look at these examples and see which might work for you.

Finding the right 'together time' for your family

Both time

Some people find it helps to choose just one tip to concentrate on. Choose one tip you think you could do more often during your 'Together Time'.

Choosing a Super Communicator Tip

Get down to your child's level

Follow your child's lead and interests

Pause and wait for your child to show you what they are interested in

Describe what your child is doing or looking at - imagine what they are thinking and feeling and say that

Listen, watch and respond to your child

Copy what they say and add a word

Ask fewer questions and instead describe what is happening

Ask open questions

Show you are having fun and use an interesting voice

How to be a super communicator booklet

1. Discussions of need and shared goal setting

How to be a Super Communicator

- ★ Your child's language helps set their path for learning right through childhood.
- ★ Language and communication support your little one to understand the world around them, express how they feel and interact with others.
- ★ Being a 'super communicator' can help your child learn words and sentences.

There are lots of ways to be a 'super communicator'. Follow the tips on the next page. These tips can be used at any time of the day, during everyday routines and play.

Scan the QR code to watch some families and see how they are helping their child to learn.

Super Communicator Tips

 Get down to your child's level	 Follow your child's lead and interests
 Pause and wait for your child to show you what they are interested in	 Describe what your child is doing, looking at, or feeling at that time
 Listen, watch and respond to your child	 Copy what your child says and add a word
 Use fewer questions and instead describe what is happening	 Ask open questions
 Show you are having fun and use an interesting voice	

Now you're going to set your Super Communicator goal

Cut out the 'Setting your Super Communicator goal' sheet from the back of this booklet.

Finding the right 'together time' for your family

Why is language important?

- ★ Your child is learning new things every day, making new brain connections faster than at any other time in their lives.
- ★ Language development starts as early as before your child is born and continues all the way through childhood.
- ★ You are your child's first teacher. Your child will be learning language from you in all of your conversations, games and daily life.
- ★ All the little chats you have with your child over the day set the stage to support their learning and development as they grow.
- ★ You don't need special toys or activities. Your child will learn from your talk during all of your everyday routines like tidying up, bath times and going for walk.
- ★ Helping your child's language and communication in this way is important because it means they can express how they feel, share fun and make friends.
- ★ Your child's language helps set their path for learning right through childhood.

How can I help my child's language development?

- ★ Communication is more than just talking. Your child is communicating with you even before they are using words. This may be through looking at you or something they would like, pointing, smiling, frowning, and making sounds.
- ★ When you watch, listen, and respond to your child's communication this makes them feel understood. It will let them know you are interested in what they have to share and will encourage them to communicate more.
- ★ You can do this by:
 - Getting down to your child's level
 - Following your child's lead and interests during play
 - Pausing and waiting for your child to show you what they are interested in
 - Listening, watching, and responding to your child's communication
 - Copying what your child says and adding a word
 - Using simple language to describe what your child is doing
 - Asking open questions
 - Using an interesting voice and having fun!
- ★ Talking with your child in this way during your daily routines will help your child make connections between words they hear and the world around them.
- ★ For more information, helpful tips, and advice to support your child's communication, visit:
[BBC's Tiny Happy People / Hungry Little Minds](#)

How to be a super communicator booklet

2. Super Communicator tips – the how and the why

Super Communicator Tips:
The how and the why

Describe what your child is doing or looking at - imagine what they are thinking and feeling and say that

This will help your child:

- ★ Hear the language they need to talk about what interests them. This will help them learn words more quickly

Follow your child's lead and interests

This will help your child:

When you do ask questions, try to keep them open

This will help your child:

- ★ By opening up the conversation, allowing it to continue with more turns and follow your child's interests

'Why' questions such as 'what', 'why', 'who' open up the conversation. Open questions encourage more than just yes or no answers. 'I wonder...' can be a nice way to encourage open responses if your child feels the direct questions are too demanding.

Get down to your child's level

This will help your child:

- ★ Hear your words and sentences more easily
- ★ See what you are looking at

Show you are having fun and use an interesting voice

This will help your child:

- ★ Focus and listen to what you are saying
- ★ Pick out important words
- ★ Have fun and enjoy learning words and sentences and about the world around them

Playing and having fun together makes it easier for your child to join in and take turns. It is important that your child sees you having fun. This will encourage them to interact and communicate with you. The more you communicate together the more words and sentences they can learn.

When you copy what your child does and add something new

This will help your child:

- ★ Know the meaning of words
- ★ Learn new words
- ★ Learn how to use words

If your child says 'big car', you could add an additional 'fast car'.

Listen, watch, and respond to their communication

This will help your child:

- ★ Show what interests them
- ★ Keep the conversation going about something they are interested in
- ★ Learn to link the words they hear with their meanings

Think about the different ways your child could be communicating. This is through looking at you or something they would like, pointing, making sounds, frowning, and making sounds. If you don't understand what your child means, use the clues around you to make sense of what they are saying. The more turns you and your child take in conversation, the more words and sentences your child will learn.

See My Happy People | Newcastle University

How to be a super communicator booklet

3. Other ways to support your child's language

Other ways to support your child's language

Children learn a range of skills through play. This includes turn taking skills, motor skills and using new words and sentences. There are many ways you can play with your child, for example:

- ★ Pretend play is when children use their imagination when playing with toys. For example, pretending to drink from a cup, putting a doll to bed, having a teddy bears' picnic.
- ★ Turn taking toys, such as a ball or cars, allow your child to hear the same words and phrases, over and over again. For example, "ready, steady, go" and "your turn, my turn".
- ★ Jigsaw puzzles help develop a child's language as they hear the names of the pieces/objects repetitively. You could give a choice between two pieces, name the pieces, or make sounds e.g., 'moo' for cow.

Playing with your child

Children learn a range of skills through play. This includes turn taking skills, motor skills and using new words and sentences. There are many ways you can play with your child, for example:

- ★ Pretend play is when children use their imagination when playing with toys. For example, pretending to drink from a cup, putting a doll to bed, having a teddy bears' picnic.
- ★ Turn taking toys, such as a ball or cars, allow your child to hear the same words and phrases, over and over again. For example, "ready, steady, go" and "your turn, my turn".
- ★ Jigsaw puzzles help develop a child's language as they hear the names of the pieces/objects repetitively. You could give a choice between two pieces, name the pieces, or make sounds e.g., 'moo' for cow.

Tiny Happy People 1 2 3 4 5 6 7 8 9 10 11 12
Newcastle University

Reading Books with your child

This will help your child:

- ★ Look at the pictures and talk about what your child is interested in.
- ★ Pause and wait for your child to talk about the pictures.
- ★ Listen and expand on what your child says. If they say 'ball', you could say 'yes, a big ball'.
- ★ Ask open questions such as 'where, who, what, when'.
- ★ Avoid questions where your child might answer 'yes' or 'no' or just point.

TIP: You don't just have to read the words of the book. You can talk about the different pictures you see, use different voices and facial expressions to be interested, or help your child make predictions e.g. 'I wonder what will happen next...'

Newcastle University

Daily Routines

- ★ **In the kitchen:** Letting your child help you in the kitchen can be a great way for them to learn the names of different foods. You could give them a pan and spoon to let them copy you.
- ★ **Putting away the shopping:** Putting away the shopping together can also encourage your child to learn the names of different foods and household items.
- ★ **Tidying up:** Tidying up together can help your child's language skills. For example, you could talk about putting toys 'in the box'.
- ★ **Cleaning up:** Your child can be your special little helper, teaching them new words such as 'wash' and 'brush'.
- ★ **Laundry:** You can help your child sort clothes into different piles, talk about big and little things, talk about the different colours and who they belong to, as well as their names.
- ★ **Getting dressed:** Talking about the clothes your child is wearing as they put them on will help your child learn the names of the different items.
- ★ **Going for a walk:** When you are outside doing errands, you can talk about all of the things your child can see from their buggy or car seat, like cars, diggers, trees and buildings.

How to be a super communicator booklet

4 Cut outs to support goal setting, reflection and remembering

Super Communicator Cut-out Resources

Use the cut-out sheets on the following pages to help you to set your goals and remember to use the Super Communicator tips.

Super Communicator

I aim to _____

...For 10-15 minutes everyday

When we are... _____

Reflection

★ What is working well?

★ What questions do I have?

Super Communicator goal

I aim to _____

...For 10-15 minutes everyday

When we are... _____

Reflection

★ What is working well?

★ What questions do I have?

Setting your Super Communicator goal

Finding the right 'together time' for your family

Both tips

Breakfast, dinner or tea time

Child and adult

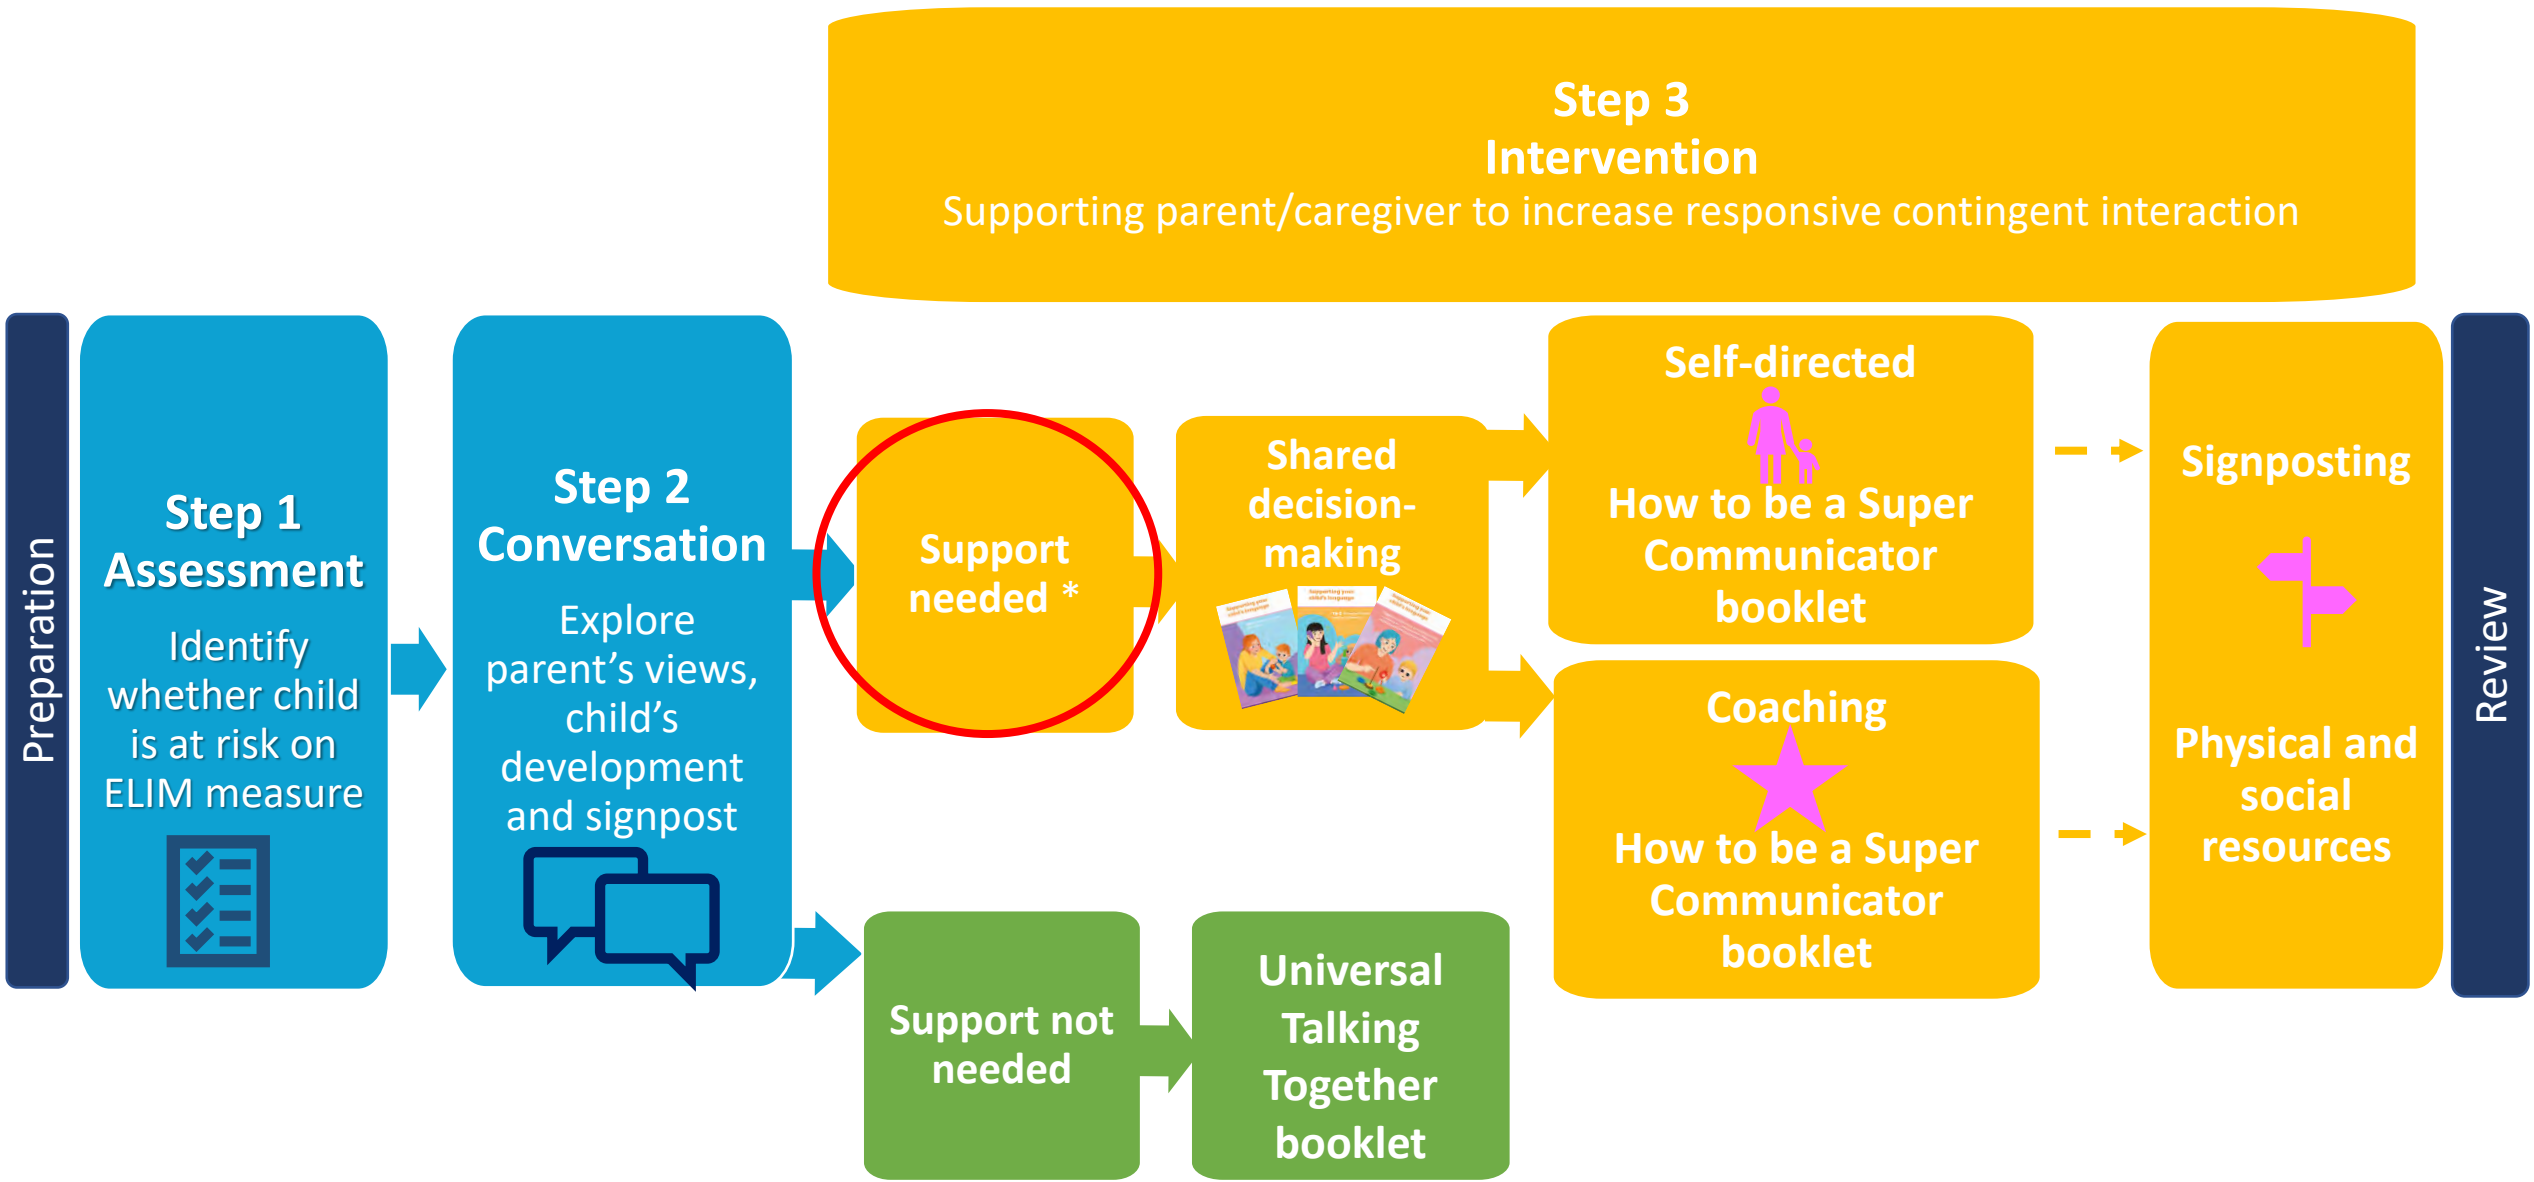

Bed time

I aim to _____

For 10 to 15 minutes every day when we are...

	Get down to your child's level		Follow your child's lead and interests
	Pause and wait for your child to show you what they are interested in		Describe what your child is doing or looking at - imagine what they are thinking and feeling and say that
	Listen, watch and respond to your child		Copy what they say and add a word
	Use fewer questions and instead describe what is happening		Ask open questions
	Show you are having fun and use an interesting voice		

NEW TINY Happy PEOPLE Newcastle University

*also onward referral if meet local criteria

— ➔ Optional step

Outcome from Steps 1 and 2		Interpretation	Action
1	Word list: ≥ 18 words AND Observation: All behaviours observed AND Conversation: No parental concern		No risk of SLCN <i>Talking Together info pack</i>
2	Word list & Observation: ≥ 18 words & all behaviours observed BUT Conversation: Parent concern	 	No identified risk of SLCN <i>Intervention</i>
3	Word list: ≤ 17 AND/OR Observation: ≥ 1 behaviour not observed		Risk of SLCN <i>Intervention</i>
4	Word list: ≤ 17 AND/OR Observation: ≥ 1 behaviour not observed AND Child meets local criteria for immediate support from SLT and/or Pediatrician		Risk of SLCN <i>Intervention AND Referral</i>

Aims

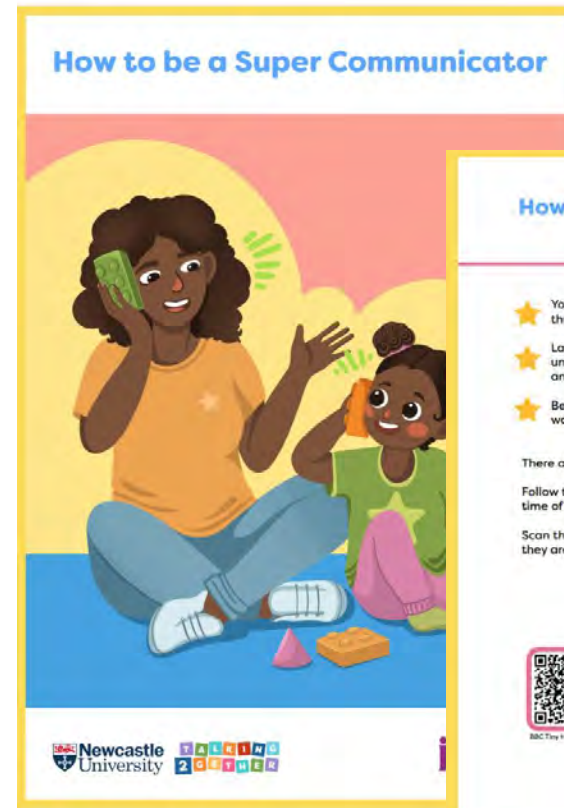

Support
needed *

- To share with parents that their child may be at risk of SLCN
- To begin the process of collaborative working between the parent and practitioner to support the child's language development
- Increase parent's understanding of responsive interaction
- Increase parent's understanding of why this is important for their child
- Ensure sure parents do not feel blamed for their child's difficulties whilst also understanding they can make a difference to help their child

Resources

How to be a Super Communicator Booklet

- Page 1 – How to be a super communicator and THP video link
- Page 2 – summary of the 9 tips

Support needed *

Actions

Support
needed *

1. Explain and discuss the outcome of the ELIM assessment
2. Provide with 'How to be a Super Communicator' booklet
3. Talk about working together to find ways that can help their child
4. Discuss how specific kinds of talk and interaction support children's language development to improve more rapidly.
5. Explain how some children find it harder than others to pick up language and communication. For these children there is a need to become 'super communicators' and increase responsive communication to help them to learn from those around them.
6. Show the 'super communicator video' - which shows parents/caregivers interacting with their toddlers and engaging in responsive communication in everyday contexts - responsive interaction behaviours are tagged and explained

Support
needed *

You might say.....

“From our conversations and from the wordlist we filled in it seems like [child’s name] might need a little help to support them to learn words and sentences.

Some children find it harder than others to learn to talk just like some children walk later than others.

There is no clear reason why some children find this harder than others.

But we can help them.

*Often there are some simple steps we can take to help them to catch up.
We can talk about those with you and we have some guidance which can help”*

You might also say, if onward referral is indicated

Support
needed *

I also think it would be good to ask the Speech and Language Therapy Team to see if they have any other advice which could help [NAME] too and to check how he/she is progressing. How would you feel about that?"

You might say

Support
needed *

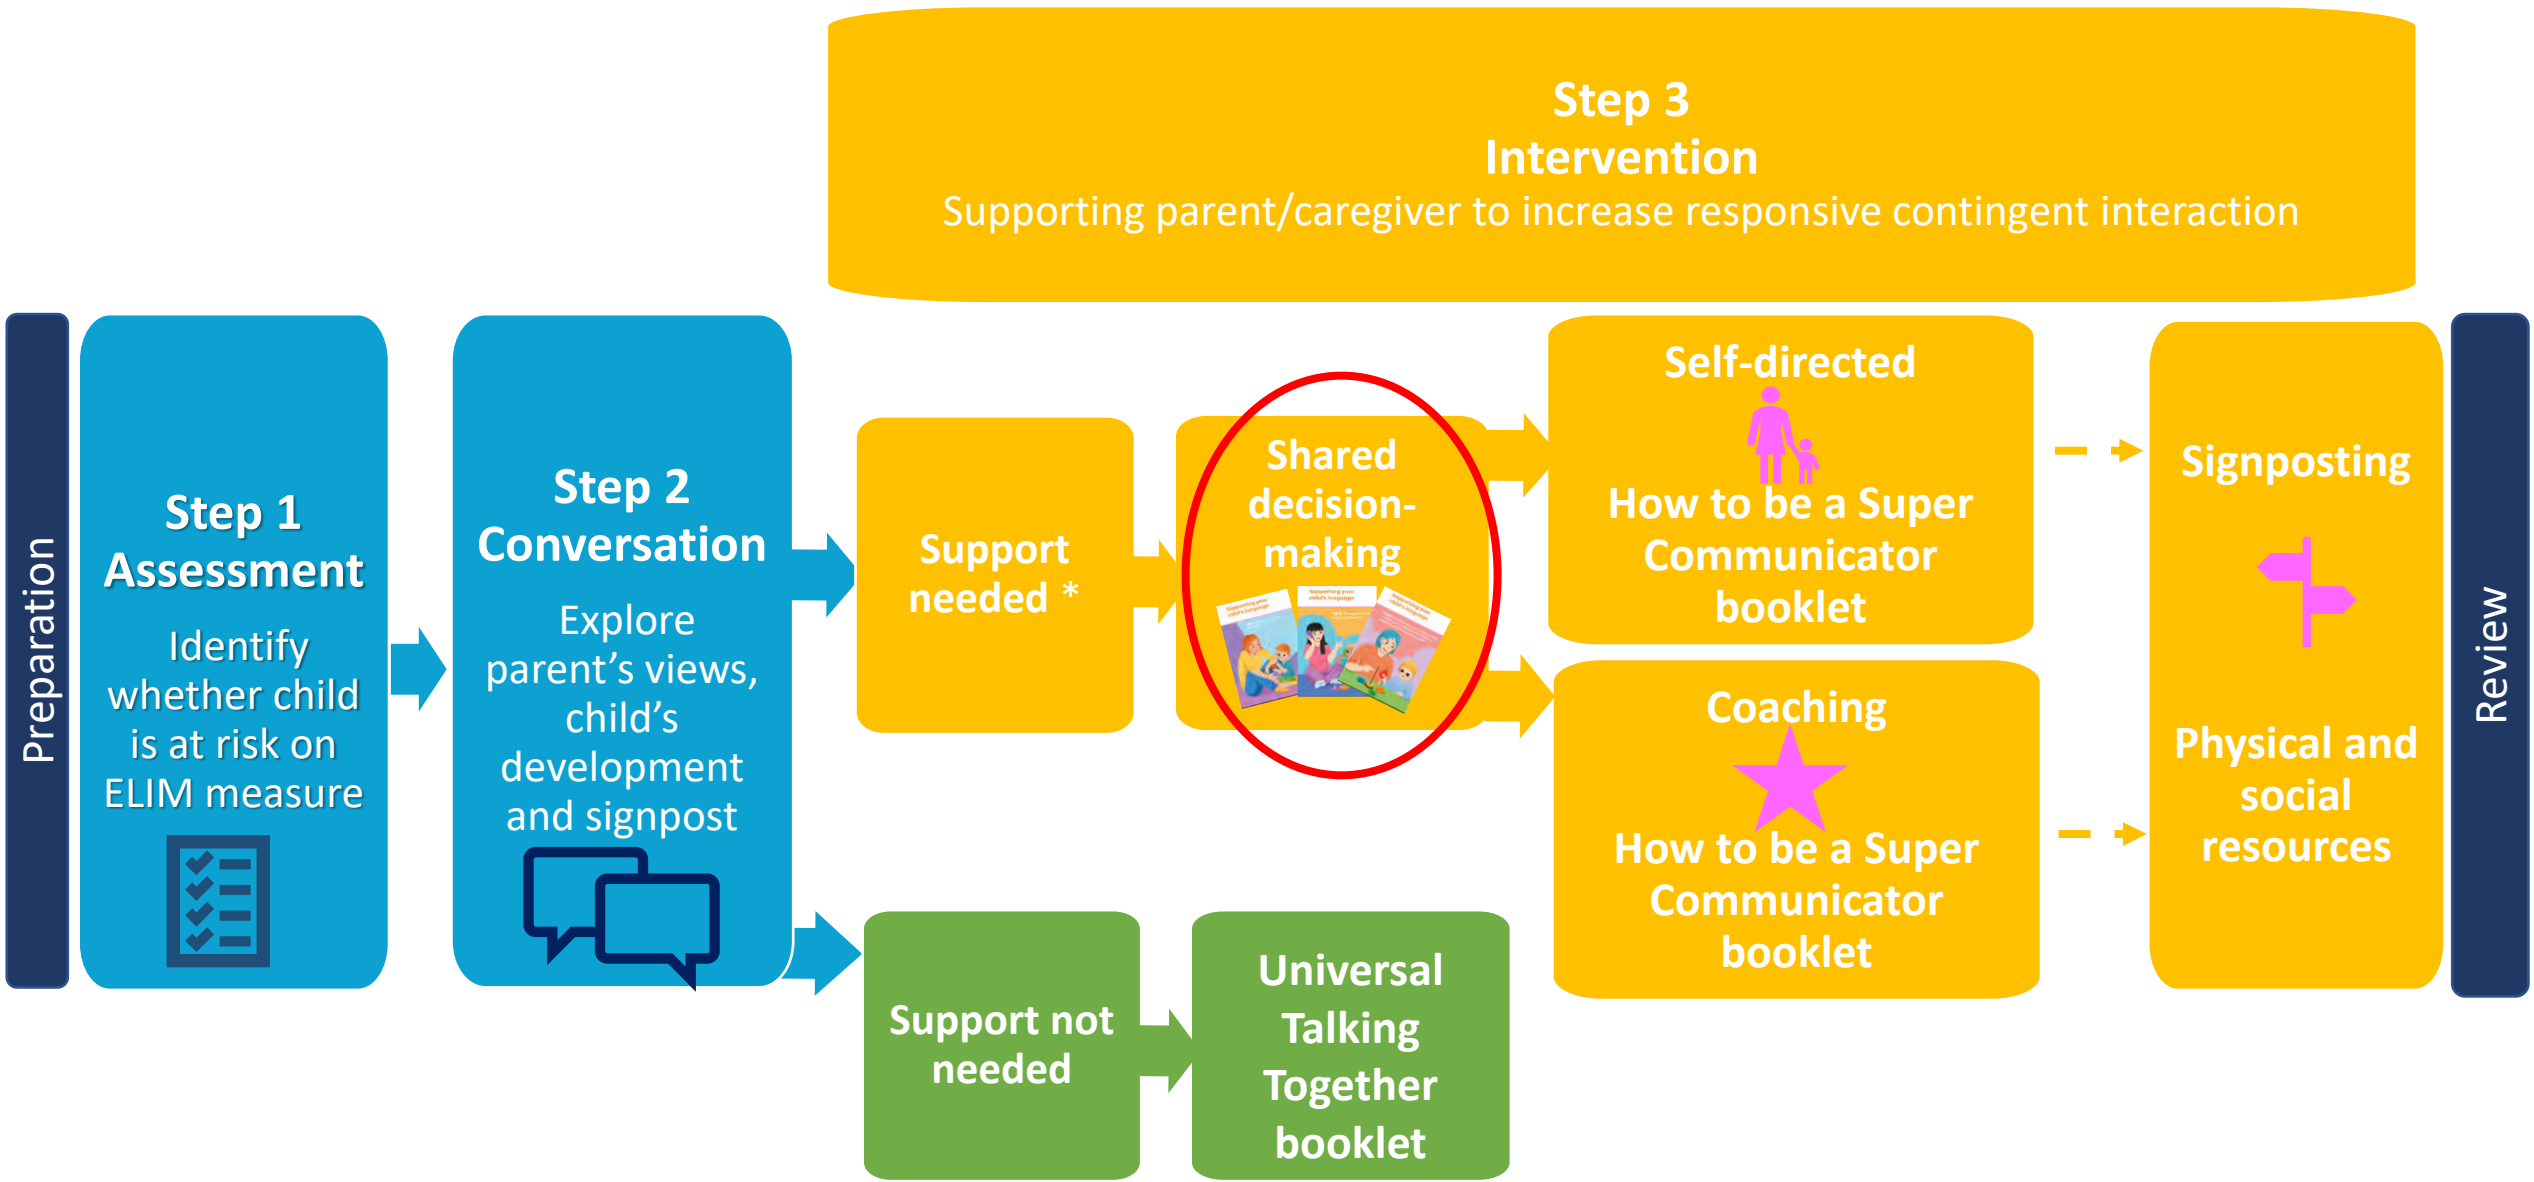

This video shows the specific ways of communicating which we know help children learn.

We know you will be doing lots of these already. When children are finding it harder to learn words and sentences we need to become super communicators and “dial up” our use of these ways of communicating

Let’s watch the video together to see what we mean by being a super communicator

HOW TO BE A
SUPER
COMMUNICATOR

**Step 3
Intervention**
Supporting parent/caregiver to increase responsive contingent interaction

**Step 1
Assessment**
Identify whether child is at risk on ELIM measure

**Step 2
Conversation**
Explore parent's views, child's development and signpost

Support needed *

Shared decision-making

Self-directed
How to be a Super Communicator booklet

Coaching
How to be a Super Communicator booklet

Signposting
Physical and social resources

Review

*also onward referral if meet local criteria

— ➔ Optional step

Aims

- Use a shared decision-making approach to enable a strengths-based approach and to build trust and feeling of working in partnership
- Increase parent's understanding of responsive interaction
- Help parents to reflect on what they are already doing to help their child
- Help parents to choose one super communicator tip to focus on doing more often - to practice 15 minutes every day
- Help parents to reflect on the times of day when they can best connect with their child and practice their chosen behaviour - when is their best 'Together Time'?
- Agree a goal of *when* they are going to practice their super communicator tip

Resources

Goal setting cut out

Shared decision-making cards

Setting your Super Communicator goal

Finding the right 'together time' for your family

With my Happy PEOPLE Newcastle University

Setting your Super Communicator goal

I aim to _____ for 10 to 15 minutes every day when we are _____

<p>Get down to your child's level</p>	<p>Follow your child's lead and interests</p>
<p>Pause and wait for your child to show you what they are interested in</p>	<p>Describe what your child is doing or looking at - imagine what they are thinking and feeling and say that</p>
<p>Listen, watch and respond to your child</p>	<p>Copy what they say and add a word</p>
<p>Use fewer questions and instead describe what is happening</p>	<p>Ask open questions</p>
<p>Show you are having fun and use an interesting voice</p>	

With my Happy PEOPLE Newcastle University

Actions

1. Sort the super communicator tips cards into 2 piles with the parent – those they are doing a lot already – those they think they could try to do more often.
2. If the parent is unsure you could point out things you have noticed they do to get the conversation started.
3. Ask the parent to choose 1 behaviour they would like to try to do more to help their child's language and communication development

You might say.....

It will help your child's language and communication to try to use these ways of talking more often.

We know you will be doing lots of these already. But if we choose one that you could try to do a little more this could help your child to learn words and sentences more easily.

Lets look through these card that list the super communicator tips and see which ones you do a lot already and which you might want to try to do more.....

I noticed you use a lovely interesting voice when you talk to.....

Actions

1. Support the family to reflect on their family's routines and what times of day are the best times to tune in and chat with their child.
2. Talk through how every family has different rhythms to the day and different times of the day when they might have the time or energy or help from others to be able to tune in to their child's communication
3. Sort the 'Together Time' cards into 2 piles with the parent – those they feel would definitely NOT work for them and those, which they feel they could try.

You might say.....

Every family has different rhythms to the day and different times of the day when they might have the time or energy or help from others to be able to tune in to their little one's communication.

We call this 'Together time' – the time of day when you can best tune in to your little one.

Can you think when might be your best time for 'Together Time'?

This could be based on what your little one finds more interesting, when you have help from a partner or friend, when you and your child are least tired, or when the household is less busy and distracting"

You might say.....

“Let’s take a look at these possible ‘together times’ – we are going to choose one for you to practice using the super communicator tips over this next week/few weeks.

Which of these would be your best together time? Or is there a different time that would be best for you?”

Actions

3. Show the parent the goal setting cut out
4. Support the parent to fill this in with the chosen super communicator tip and their chosen 'Together Time'

"I aim get down to my child's level for 10 – 15 minutes per day when we are out and about on the school run."

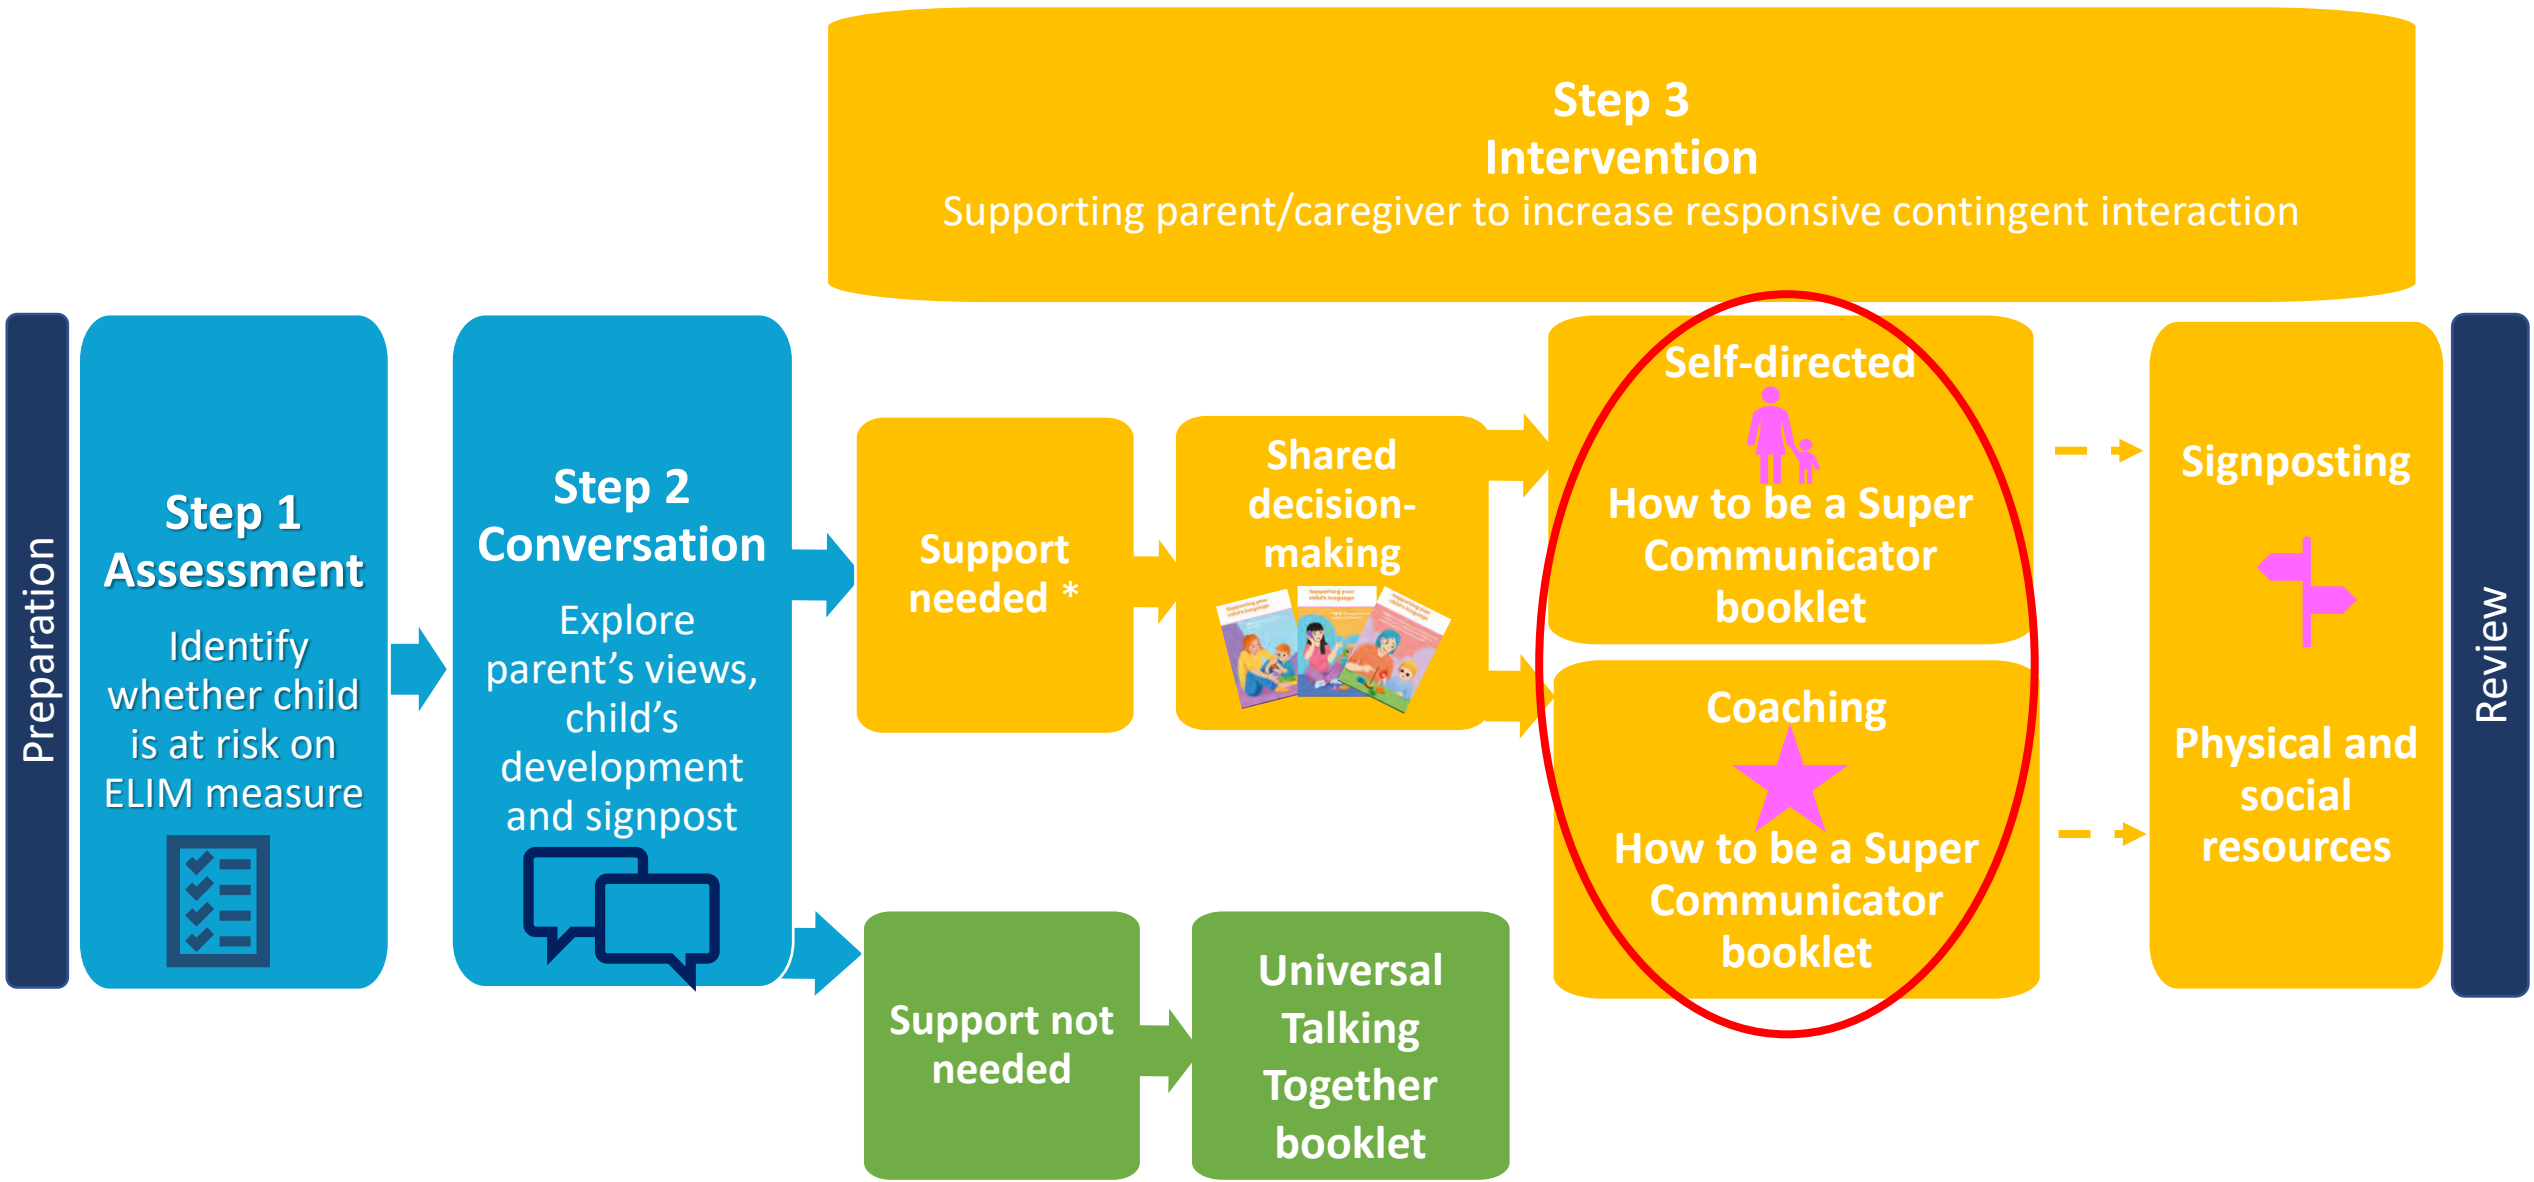

You might say.....

“That’s great – let’s write down what you aim to do – soyou will follow the child’s lead for 15 minutes every day during bath time”

“Is there somewhere you can put this – like on your fridge – where you will see it every day?”

*also onward referral if meet local criteria

— ➔ Optional step

What are the options for tailored support?

One additional visit after goal setting
Optional text reminders
Telephone review

Or

Between 2 and 4 additional visits
Optional reminders
Telephone or face to face review

Optional extra information & support about physical &/or social resources

NOTE: Approaches use the same resources – the Super Communicator Booklet – differ in the level and type of support from the practitioner

Aims

- To agree with the family the level and type of tailored support which would best support them to reach their goal
- The practitioner to support this decision by considering the barriers and enablers to responsive communication in place for this family drawing on
 - Your knowledge of the COM-B framework
 - Your knowledge of the family
 - The discussions during Step 2 – the conversation
 - The discussions during shared goal setting
- To agree a plan for future contacts

Reminder of the COM-B model

COM-B components and examples

COM-B component	Sub-category	Example
Capability	Physical capability	Physical skill, strength, or stamina
	Psychological capability	Knowledge or psychological skills, strength, or stamina to engage in the necessary mental processes
Opportunity	Physical opportunity	Opportunity afforded by the environment involving time, resources, locations, cues, physical 'affordance'
	Social opportunity	Opportunity afforded by interpersonal influences, social cues and cultural norms that influence the way that we think about things, for example the words and concepts that make up our language
Motivation	Reflective motivation	Reflective processes involving plans (self-conscious intentions) and evaluations (beliefs about what is good and bad)
	Automatic motivation	Automatic processes involving emotional reactions, desires (wants and needs), impulses, inhibitions, drive states and reflex responses

Resources

COM-B mapping

In Practitioner Guide find handout listing the specific enablers which support a family to increase their use of responsive communication categorised into Capability, Motivation, Physical and Social Opportunities and Mapping to type of tailored support

Enablers for increasing responsive interaction

COM-B component	Enablers
Capability	<p>Has the skills and knowledge to...</p> <ul style="list-style-type: none"> Follow the child's lead and interests Use responsive interaction behaviours in play, book sharing and daily routines Choose developmentally appropriate activities, toys, books Decide on a goal, monitor their behaviour, and stick to a plan
Motivation	<p>Has the belief in their own capabilities and feeling of optimism so that they feel:</p> <ul style="list-style-type: none"> they <u>can</u> increase their responsive interactions it is <u>worthwhile</u> to make this change it is <u>possible</u> within their current circumstances the child <u>will respond</u> to them if they try they have a definite <u>intention</u> to try to change that what they do <u>will make a difference</u> to their child <p>.....they do not feel</p> <ul style="list-style-type: none"> embarrassed using responsive interaction that people may judge them if they try overwhelmed by other demands in their life
Physical Opportunity	<p>Has access to:</p> <ul style="list-style-type: none"> books, toys activities to support responsive interaction contexts like playgroups, library drop-ins etc to support the of responsive interaction
Social Opportunity	<p>Has access to:</p> <ul style="list-style-type: none"> a family and/or social network to support them emotionally and practically a social group who also uses responsive interaction in a range of contexts opportunities to spend time with their child which is rewarding for both the child and the parent/caregiver

	Deciding on level of tailored support
Would the family benefit from a self-directed approach?	This is appropriate if the family has most enablers in place and the only barriers fall in the category of Capabilities (i.e., relate to skills, knowledge self-monitoring and deciding on a goal)
Would the family benefit from a coaching approach?	This is appropriate if the family has a number of barriers to using the behaviours and especially if they fall in the category – Motivation (i.e., relate to confidence, optimism, feelings of overwhelm, feel the change is worthwhile, believe their child will engage and can change, feel that what they do can make a difference)
Would the family benefit from support to access toys and books and to use the available resources they have to chat and play?	This is appropriate if the family has barriers in terms of Physical Opportunities – that is few physical resources to support the child's play and development and limited access to contexts which support chat and play
Would the family benefit from support to access childcare and social support in the community?	This is appropriate if the family has barriers in terms of Social Opportunities – that is limited access to childcare, social support networks, and contexts which encourage chat and play

Enablers for increasing responsive interaction

COM-B component	Enablers
Capability	<p>Has the skills and knowledge to...</p> <ul style="list-style-type: none"> • Follow the child's lead and interests • Use responsive interaction behaviours in play, book sharing and daily routines • Choose developmentally appropriate activities, toys, books • Decide on a goal, monitor their behaviour, and stick to a plan
Motivation	<p>Has the belief in their own capabilities and feeling of optimism so that they feel:</p> <ul style="list-style-type: none"> • they <u>can</u> increase their responsive interactions • it is <u>worthwhile</u> to make this change • it is <u>possible</u> within their current circumstances • the child <u>will respond</u> to them if they try • they have a definite <u>intention</u> to try to change • that what they do <u>will make a difference</u> to their child <p>.....they <u>do not</u> feel</p> <ul style="list-style-type: none"> • <u>embarrassed</u> using responsive interaction • that people may <u>judge</u> them if they try • <u>overwhelmed</u> by other demands in their life
Physical Opportunity	<p>Has access to:</p> <ul style="list-style-type: none"> • books, toys activities to support responsive interaction • contexts like playgroups, library drop-ins etc to support the of responsive interaction
Social Opportunity	<p>Has access to:</p> <ul style="list-style-type: none"> • a family and/or social network to support them emotionally and practically • a social group who also uses responsive interaction in a range of contexts • opportunities to spend time with their child which is rewarding for both the child and the parent/caregiver

	Deciding on level of tailored support
Would the family benefit from a <u>self-directed</u> approach?	<i>This is appropriate if the family has most enablers in place and the only barriers fall in the category of Capabilities (i.e., relate to skills, knowledge self-monitoring and deciding on a goal)</i>
Would the family benefit from a <u>coaching</u> approach?	<i>This is appropriate if the family has a number of barriers to using the behaviours and especially if they fall in the category – Motivation (i.e., relate to confidence, optimism, feelings of overwhelm, feel the change is worthwhile, believe their child will engage and can change, feel that what they do can make a difference)</i>
Would the family benefit from support to <u>access toys and books</u> and to use the <u>available resources</u> they have to chat and play?	<i>This is appropriate if the family has barriers in terms of Physical Opportunities – that is few physical resources to support their child's play and development and limited access to contexts which support chat and play</i>
Would the family benefit from support to <u>access childcare and social support</u> in the community?	<i>This is appropriate if the family has barriers in terms of Social Opportunities – that is limited access to childcare, social support networks, and contexts which encourage chat and play</i>

Actions

1. Practitioner and family discuss the options for support (self-directed or coaching) and practitioner suggests an approach they feel would be beneficial based on the COM-B mapping.
2. Practitioner and family agree an approach and date(s) for additional visit(s) – a family plan might be useful here.

You might say.....

“How about I pop back in a week and we can look at how you are getting on with trying your super-communicator goal and I can drop off some more resources and ideas to help you?”

OR

“I have some resources here to support you with using that super communicator goal – maybe we could look through them together now and then I can check back in in a couple of months to see how you are going”

You might say.....

“How about we set up a few dates when I can pop back in and we can look at ways to help you to practice the super-communicator tip

I can bring some more resources and ideas to help you and you can ask any questions as you try it”

Using the ELIM-I in practice

Professor Cristina McKean, Dr Jenna Charlton, Dr Christine Jack,
Emily Armstrong, Dr Penny Levickis, Vicky Gilroy

Building on work led by Professor James Law

www.research.ncl.ac.uk/elim-i

Part 4c

This training will cover.....

Part 1: Overview of the ELIM-I steps

Part 2: Overview of the ELIM-I resources

Part 3: Background to the ELIM-I intervention

Part 4: Step by step guide to delivering the ELIM-I

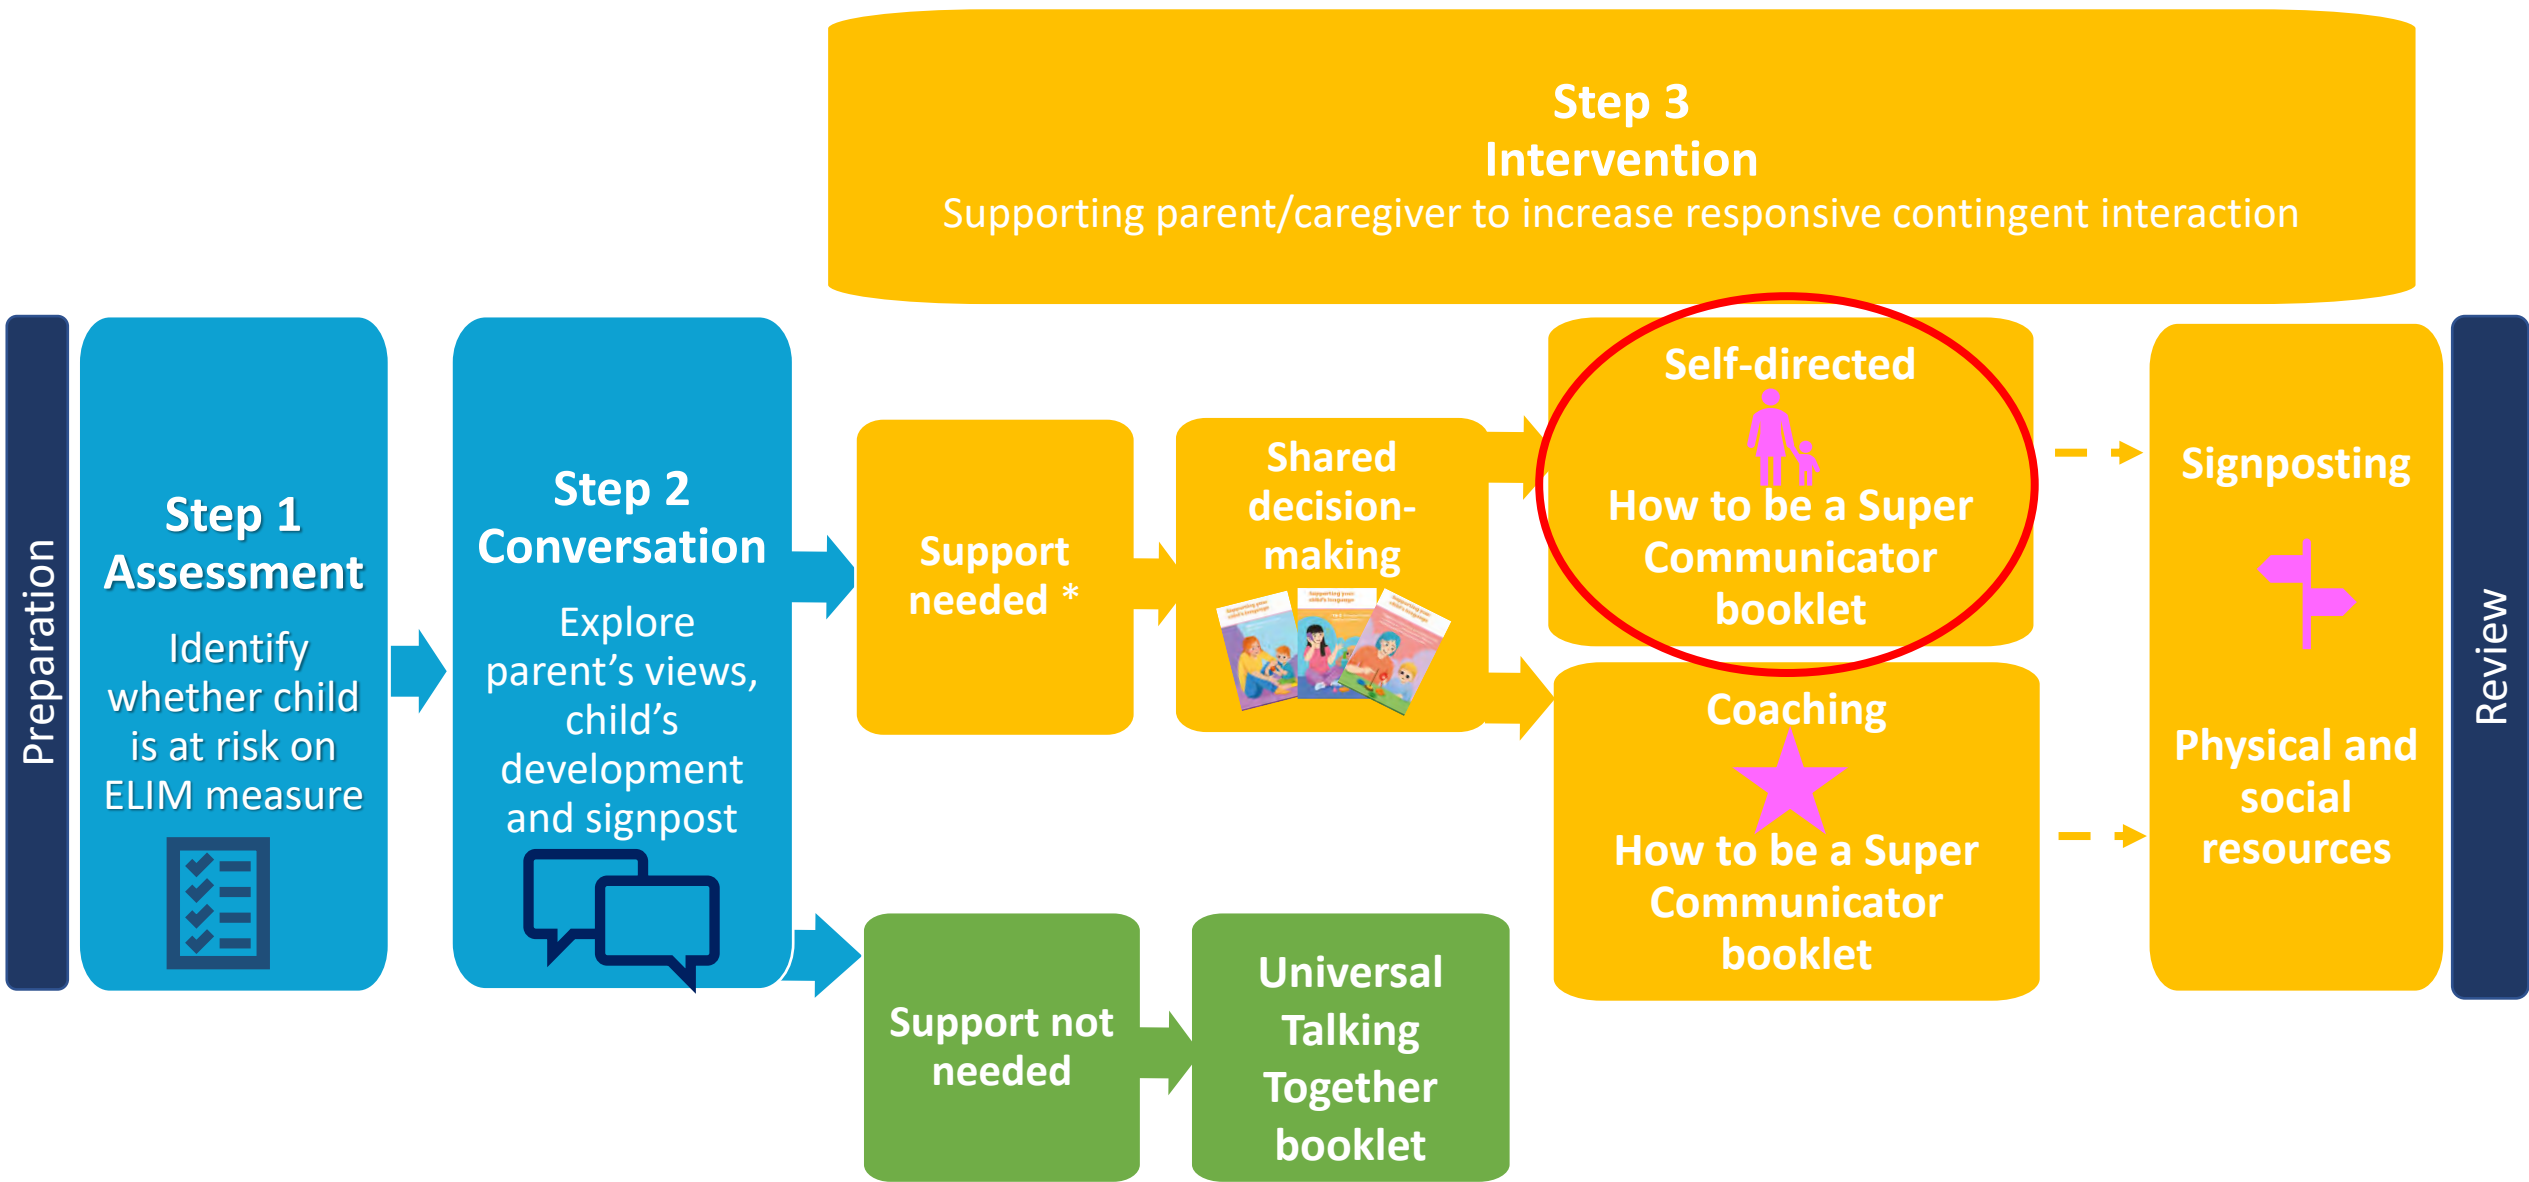

a. Preparation – Assessment - Conversation - Universal Support

b. The Intervention – Shared Goal Setting

c. The Intervention – a Self-directed approach

d. The Intervention – a Coaching approach and Signposting

Part 5: Accessing the resources

*also onward referral if meet local criteria

— ➔ Optional step

Aims

Self-directed

Review

- Address capability barriers to using responsive communication behaviours
- Provide resources and advice to support the parent to
 - **Remember** their goal
 - **Remember** why to use the super communicator tip
 - **Reflect** on how things are going

Actions

Self-directed

Review

1. Remember how and why

- check with the parent their goal and their together time
- look at the relevant 'how and why' section in the booklet.
- watch the video example and talk through how their chosen tip will help their child's language to develop
- ask if they have read the 'why is language important' page and see if they have any questions

Resources

Super communicator tips - how and why pages & videos

Describes the specific super communicator tip they have chosen

QR code to THP video of that tip to help them see it modelled

Provides motivational information about how this super communicator tip can help their child

Why is Language Important

Outlines why language is important and celebrates parents as child's first teacher

Self-directed

Review

Follow your child's lead and interests

This will help your child:

- ★ show you what interests them
- ★ hear the language they need to talk about what interests them
- ★ learn to link the words they hear with their meanings

Your child is more likely to communicate about something that interests them. When you follow their lead, the words you use will match the things they are thinking about. This helps them to learn the links between words and what they mean.

Scan the QR code to watch some families follow their child's lead and interest.

9

FOLLOWING YOUR CHILD'S LEAD

Copycat games with a ball

Why is language important?

- ★ Your child is learning new things every day, making new brain connections faster than at any other time in their lives.
- ★ Language development starts as early as before your child is born and continues all the way through childhood.
- ★ You are your child's first teacher. Your child will be learning language from you in all of your conversations, games and daily life.
- ★ All the little chats you have with your child over the day set the stage to support their learning and development as they grow.
- ★ You don't need special toys or activities. Your child will learn from your talk during all of your everyday routines like tidying up, bath times and going for walk.
- ★ Helping your child's language and communication in this way is important because it means they can express how they feel, share fun and make friends.
- ★ Your child's language helps set their path for learning right through childhood.

4

A teal abstract graphic on the left side of the slide, consisting of a circular shape at the top and three wavy, ribbon-like lines extending downwards.

FOLLOWING YOUR CHILD'S LEAD

Copycat games with a ball

Actions

Self-directed

Review

2. Remember what and when –

- check they remember what their chosen together time was and discuss ways that they can remind themselves or be reminded to do this every day – for example
 - Put their goal on the fridge (use cut-outs at the back of the booklet)
 - Set a reminder on their phone
 - If available in your team offer a weekly/fortnightly text message with QR/ hyperlinks to new video examples embedded (Optional)

Resources

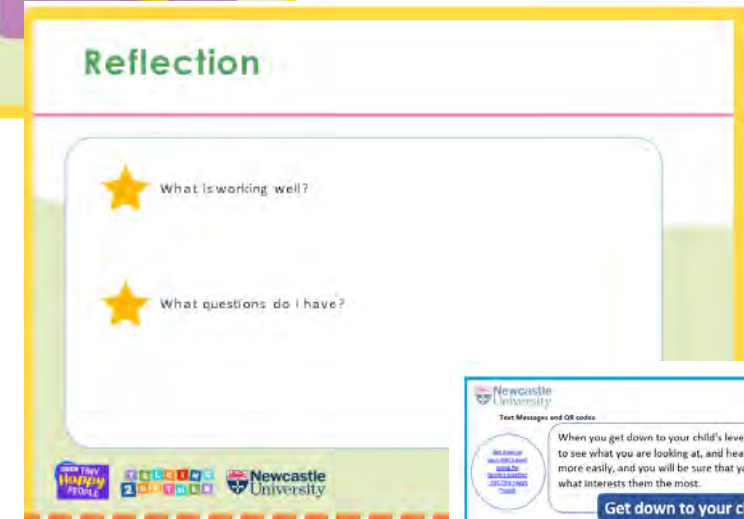

Remind and reflect cut outs

A place to reset the goal

A space to reflect on how it's going and record questions for the HV team and to discuss at the review

On the website

A set of prepared messages for a texting service if this is available to your team

Actions

Self-directed

Review

3. **Reflect** – encourage to reset their goal and fill in the reflection section on the back of the card before a review
4. **Review** – after an agreed time (~2 months after 2–2 ½ year review) call the family and review progress – use the notes and questions they may have made on their cut out goals to support the family to reflect and ask questions – decide if further action is needed

STAR coaching approach

Practitioner guide outlines
the stages of the STAR
coaching approach

 **STAR Coaching approach** 

Show: Model responsive interaction with the child – pay particular attention to the super-communicator tip which the parent is targeting

Try: Sit back and let the parents have a go at the tips – if they need encouragement, ask them to have a try and remind them of things you have already seen they are doing well to build their confidence

Appreciate: Focus on what the parents are doing well and comment on these positive strategies. *“I noticed you are really following Joe’s interests here. He loved the trains and you have followed his lead and talked about the trains – that’s great. That’s really going to help him to make connections between the words you say and what they mean.”*

Reflect: Encourage the parent to think about - *How that felt* - *What they feel they did well* - *Any things that were tricky* – and support the parent to problem solve

STAR Coaching approach

Show: Model responsive interaction with the child – pay particular attention to the super-communicator tip which the parent is targeting

Try: Sit back and let the parents have a go at the tips – if they need encouragement, ask them to have a try and remind them of things you have already seen they are doing well to build their confidence

Appreciate: Focus on what the parents are doing well and comment on these positive strategies. *“I noticed you are really following Joe’s interests here. He loved the trains and you have followed his lead and talked about the trains – that’s great. That’s really going to help him to make connections between the words you say and what they mean.”*

Reflect: Encourage the parent to think about - *How that felt* - *What they feel they did well - Any things that were tricky* – and support the parent to problem solve

Actions

Coaching

Review

1. Remember how and why

- check with the parent their goal and their together time
- look at the relevant ‘how and why’ section in the booklet.
- watch the video example and talk through how their chosen tip will help their child’s language to develop

Resources

Super communicator tips - how and why pages & videos

Describes the specific super communicator tip they have chosen

QR code to THP video of that tip to help them see it modelled

Provides motivational information about how this super communicator tip can help their child

Why is Language Important

Outlines why language is important and celebrates parents as child's first teacher

Coaching

Review

Follow your child's lead and interests

This will help your child:

- ★ show you what interests them
- ★ hear the language they need to talk about what interests them
- ★ learn to link the words they hear with their meanings

Your child is more likely to communicate about something that interests them. When you follow their lead, the words you use will match the things they are thinking about. This helps them to learn the links between words and what they mean.

Scan the QR code to watch some families follow their child's lead and interest.

FOLLOWING YOUR CHILD'S LEAD

Copycat games with a ball

Why is language important?

- ★ Your child is learning new things every day, making new brain connections faster than at any other time in their lives.
- ★ Language development starts as early as before your child is born and continues all the way through childhood.
- ★ You are your child's first teacher. Your child will be learning language from you in all of your conversations, games and daily life.
- ★ All the little chats you have with your child over the day set the stage to support their learning and development as they grow.
- ★ You don't need special toys or activities. Your child will learn from your talk during all of your everyday routines like tidying up, bath times and going for walk.
- ★ Helping your child's language and communication in this way is important because it means they can express how they feel, share fun and make friends.
- ★ Your child's language helps set their path for learning right through childhood.

2. **STAR** – use the STAR approach to support the parent to practice the super communicator tip and gain confidence, self-efficacy and resilience

- **Show** – demonstrate responsive interaction with the child paying particular attention to the super communicator tip the parent has chosen as their goal
- **Try** – encourage the parent to join in and try as well
- **Appreciate** – comment and provide positive feedback on the responsive communication behaviours the parent is using
- **Reflect** – encourage the parent to think through how they feel, what went well, if anything was tricky and problem solve with them

Coaching

Review

*“OK Let’s try using the pausing and waiting tip.
How do you feel about having a try now?”*

*I saw earlier that Jack is really loving when you get
were down at his level chatting to him. Shall we give
that another try and see if we can pause and wait
too?”*

Try

You might say.....

Coaching

Review

"I noticed you really waited and watched to see what Jack wanted to communicate with you.

He was really interested in what you said and was really listening to you. That was great.

You noticed he held out the pegs to ask for help hanging out the washing and you talked about the pegs and clothes.

That's really going to help him to make connections between the words you say and what they mean."

Appreciate

You might say.....

Coaching

Review

“How did it feel pausing and waiting like that?”

Yes it can feel strange when we first start a new habit like that but with time it will feel more natural.....

What do you think went well that time?

Yes I really saw that too.....

Reflect

You might say.....

Coaching

Review

“How do you feel Jack was responding to you waiting longer like that? Did you notice anything different about how he communicated with you?”

Yes I saw.....

Was anything there anything tricky about that?

Yes remembering to do it is hard, you might want to put some of the cut out reminders from your booklet in places around the house to try to help you

Yes, if he is doing something that you need to stop because it is unsafe you can definitely jump in.....”

Reflect

3. **Remember what and when** – help them remember what their chosen together time was and discuss ways that they can remind themselves or be reminded to do this every day – for example

- Put their goal on the fridge (use cut-outs at the back of the booklet)
- Set a reminder on their phone
- If available in your team offer a twice weekly text message with QR/ links to new video examples embedded

4. **Reflect** - give the parent the remind and reflect cutouts which has their targeted super communicator tip on it and a space for reflection. Encourage to to fill in over the coming week/2 weeks and encourage to practice every day

Actions

Coaching

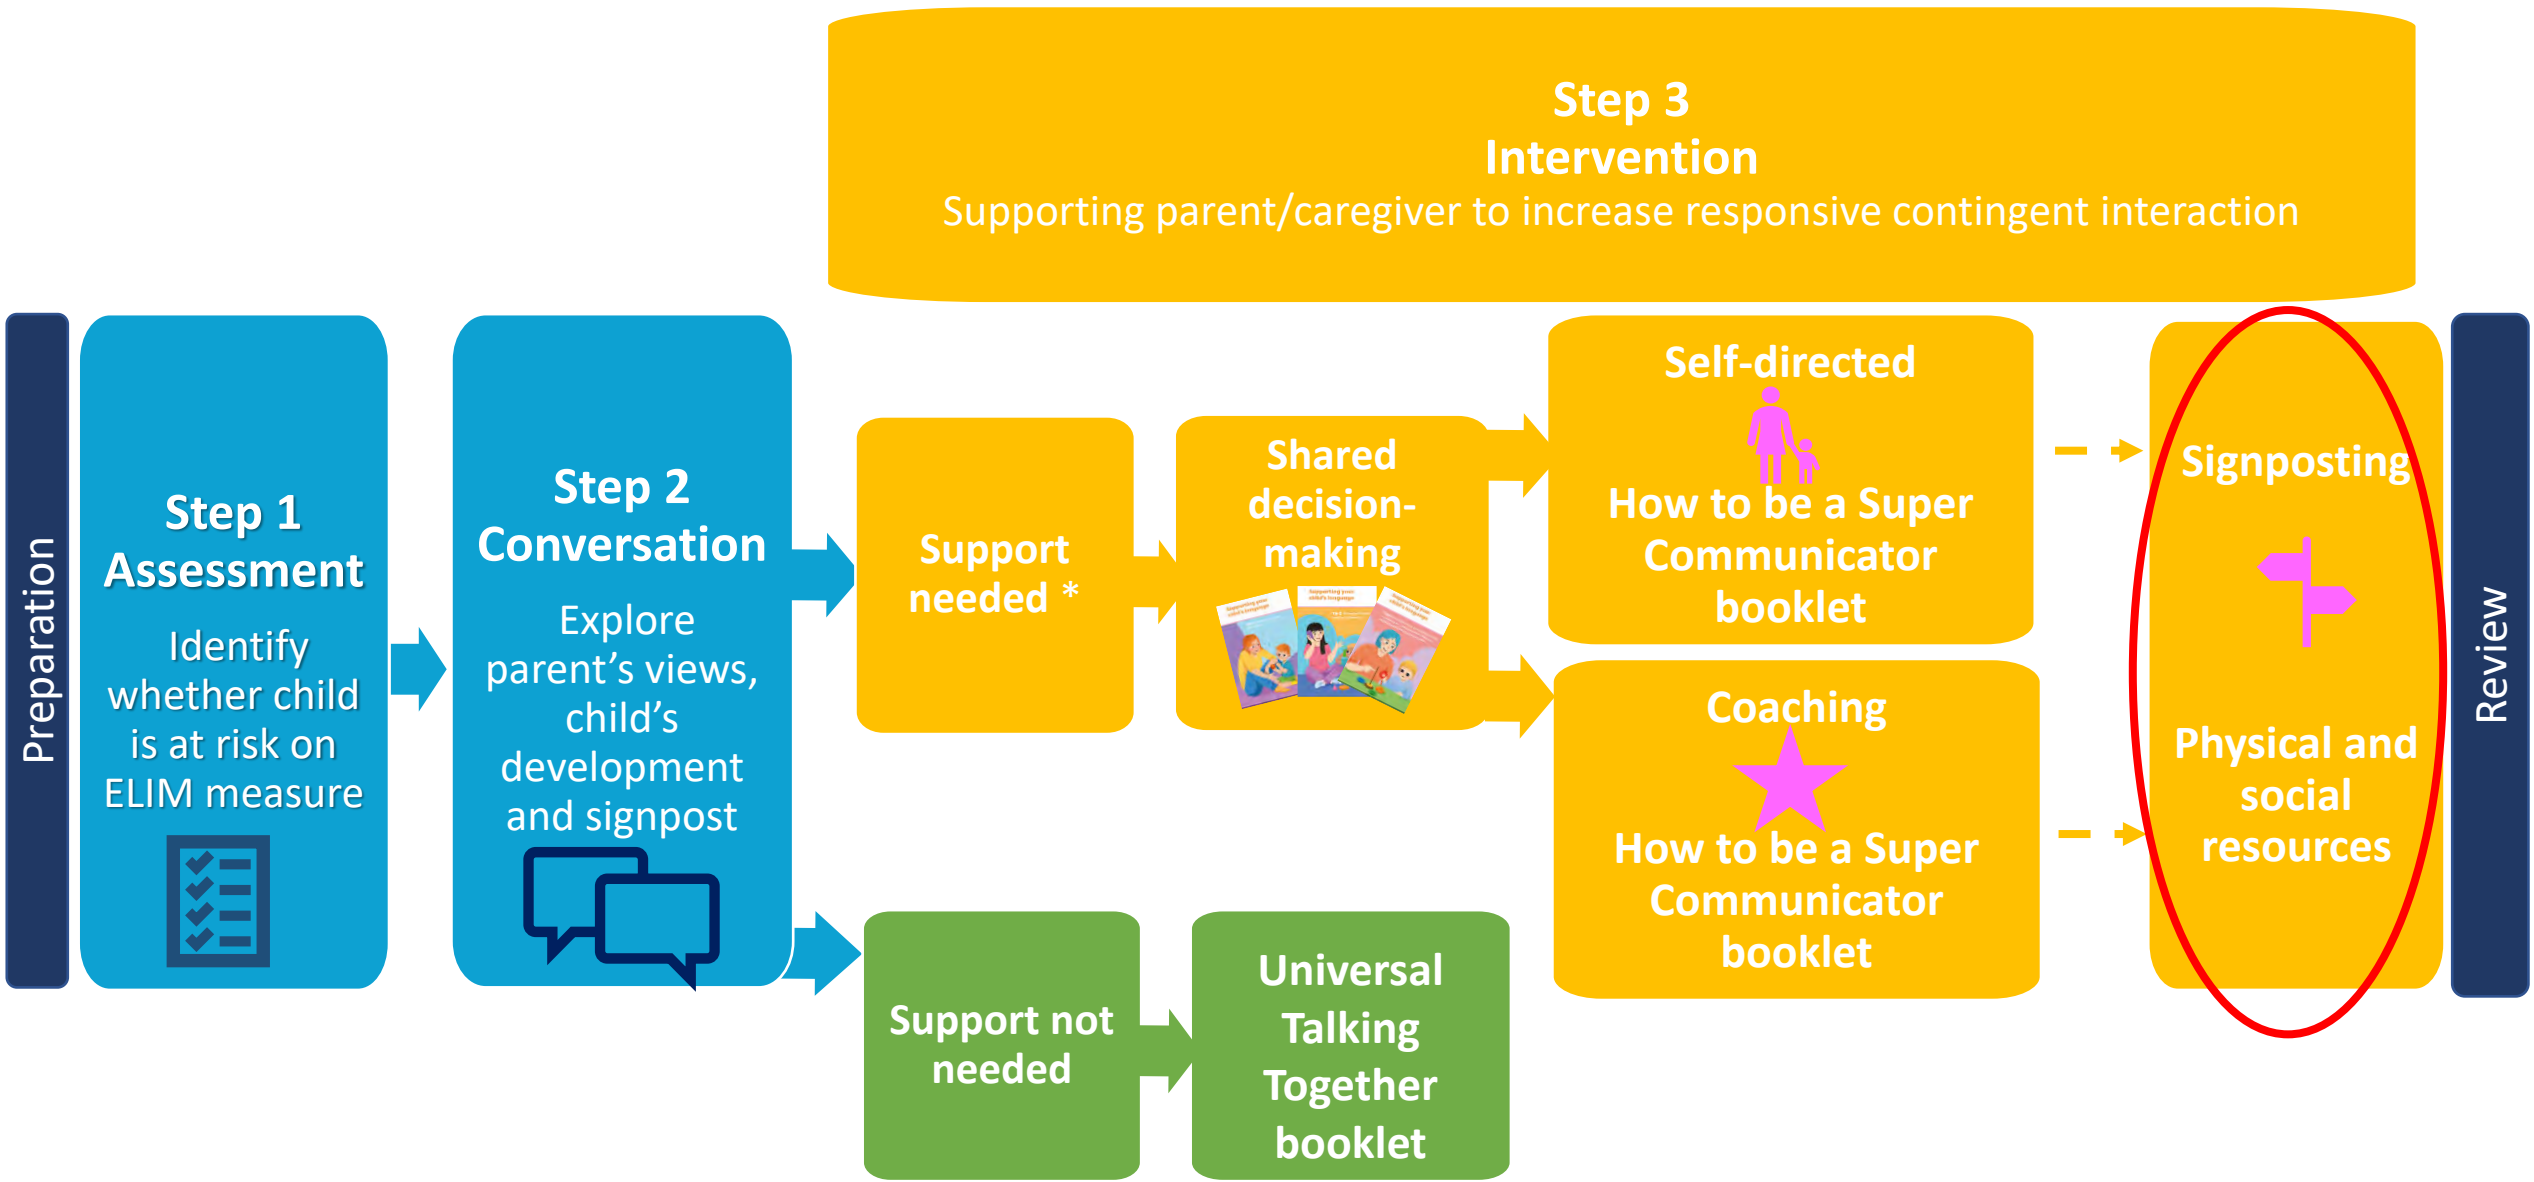

Review

5. At subsequent weekly or fortnightly visits

- Reflect and trouble shoot
- Decide whether to keep goal or choose a new one
- Repeat actions 1 – 4 (Remember why and how; STAR; Remember what and when; Reflect)

6 . **Review** – after an agreed time (~2 months after the final visit) call or visit the family and review progress – use the notes and questions they may have made on the ‘remind and reflect’ cut-outs to help the family to reflect on progress and ask questions – decide if further action is needed

*also onward referral if meet local criteria

— ➔ Optional step

Aims

- Ensure parent can make best use of the resources available to them in their home to support their child's language development

Resources

Guidance using books and toys; making the most of everyday materials and daily routines

Information and links are in the 'How to be a super communicator booklet'

QR codes link to Tiny Happy People Resources to see models

How to use everyday materials available in your home to support your child's language development

- ★ There are lots of different ways you can support your child's language development at home, using everyday objects and routines. You do not need lots of expensive toys to help your child's language to grow.
- ★ This video from BBC's Tiny Happy People talks through some everyday routines at home that will help support your children's language development.

Playing with you

Children learn a range of skills, motor skills, and language. There are many ways to support their development.

- ★ Pretend play: playing with a cup, putting a lid on it.
- ★ Turn taking: hear the same sound. For example, 'cup, cup, cup'.
- ★ Jigsaw puzzle: hear the name of the object. Could give a clue or make sounds.

Helpful Resources

QR

BBC's Tiny Happy People:

- ★ Activities, short videos and articles with helpful tips and advice to support your child's communication.

Hungry Little Minds:

- ★ Includes games, activities, and app suggestions to try with your child to support their language and literacy development.

Birth to five:

- ★ A free downloadable book providing information on caring for children up to five years old.

Speech and Language UK Ages and Stages:

- ★ A guide to the typical stages of speech and language development in babies, children, and young people.

Aims

- Ensure parent has access to resources (books, toys) to support interactions
- Encourage interaction with other parents
- Support access to 2 year offer where appropriate

Resources

Borrowing Books and Toys; local parent and toddler groups and childcare

Downloadable templates

Describes local resources in terms of book libraries and toy libraries and can be locally adapted

Can use locally developed signposting resources in addition/as replacement however marketing identity supports parent to make links to child language

Borrowing Books and Toys

Borrowing Books

Sitting down and looking at books is a great way to support their speech and attention skills. Borrowing books is a great way to access a range of books for children, without the barrier of cost.

Borrowing Toys

A toy library allows you to borrow a range of toys, free of charge. It is a great way to access a range of different toys to support your child's development.

Local Book Libraries

You can borrow a range of books from local libraries in Newcastle. Find a local library near you: [Libraries in Newcastle | Newcastle City Council](#)

Local Toy Libraries

Newcastle Action for Parent and Toddler Initiative (NAPI) has a well-established toy library service. The toy library services are available to parents and toddlers in playgroups.

Book a toy: You can loan up to 4 toys free of charge. The toys can be found in catalogues at your local library.

[Book a Toy Loan Service - Little People's Library](#)

Parent and Toddler Sessions and Childcare

Going to Parent and Toddler sessions and Nursery:

★ Going to parent and toddler sessions or childcare can be really helpful for your child's speech, language and communication development. They will have the opportunity to meet other children of a similar age, practice their listening and turn taking skills; play with a range of different toys and hear language from you, other adults and their peers.

Local Parent and Toddler Sessions

Your child could be eligible for free childcare from a playgroup; day nursery; nursery schools or some childminders.

Follow the link below to find out if you are eligible.

Using the ELIM-I in practice

Professor Cristina McKean, Dr Jenna Charlton, Dr Christine Jack,
Emily Armstrong, Dr Penny Levickis, Vicky Gilroy

Building on work led by Professor James Law

www.research.ncl.ac.uk/elim-i

Part 5

This training will cover.....

Part 1: Overview of the ELIM-I steps

Part 2: Overview of the ELIM-I resources

Part 3: Background to the ELIM-I intervention

Part 4: Step by step guide to delivering the ELIM-I

a. Preparation – Assessment - Conversation - Universal Support

b. The Intervention – Shared Goal Setting

c. The Intervention – a Self-directed approach

d. The Intervention – a Coaching approach and Signposting

Part 5: Accessing the resources

The ELIM-I website: www.research.ncl.ac.uk/elim-i

The ELIM-I website is a central point of access for ELIM-I resources

Here you will find information about the ELIM-I development, access training, and find materials for families and practitioners

Navigating the ELIM-I website

Use the headings to navigate through different sections of the website.

Resources are found under **ELIM-I > ELIM-I Measure and Intervention Resources**

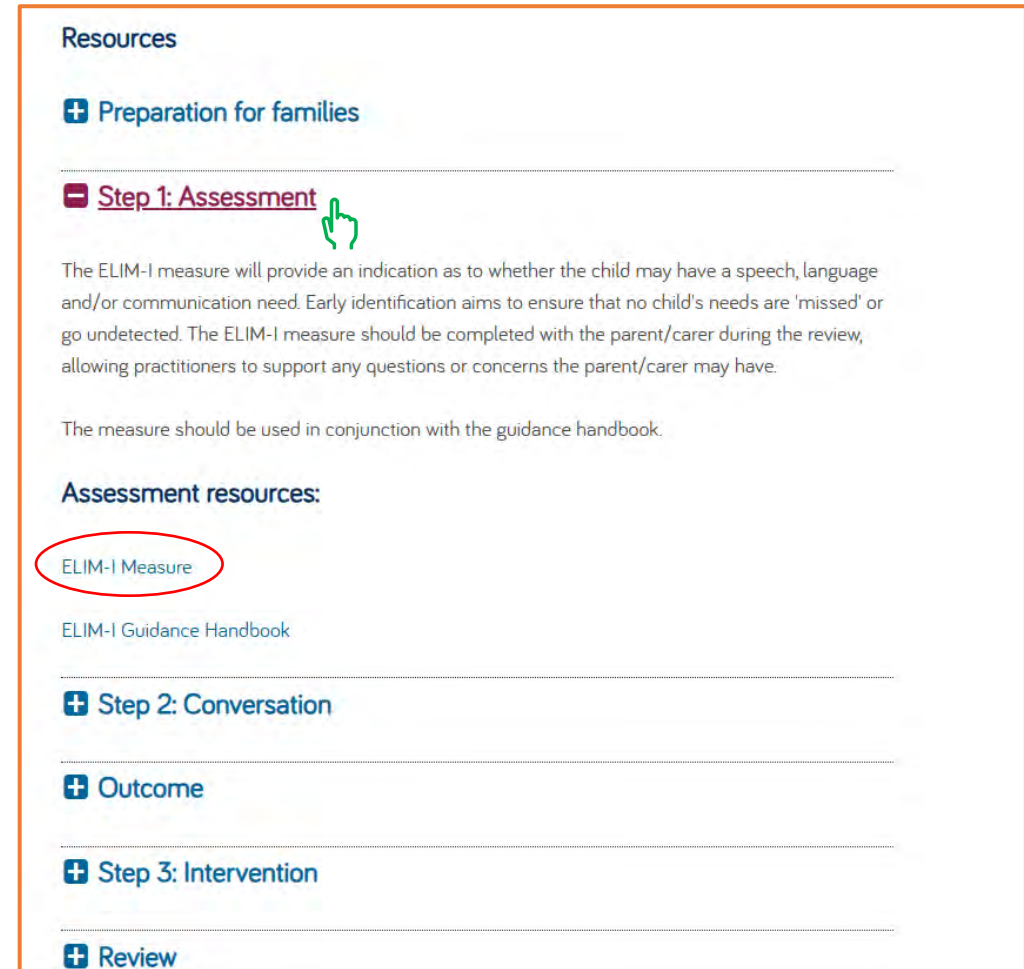

The screenshot displays the ELIM-I website interface. At the top, the title 'Early Language Identification Measure- Intervention' is visible alongside the Newcastle University logo. A navigation menu includes 'ELIM-I', 'Talking 2gether: Collaborative model of ELIM-I', 'Development Projects, Reports and Publications', and 'Contact'. A green hand cursor points to the 'ELIM-I' link. Below the navigation, a sidebar on the left lists 'ELIM-I Measure and Intervention Resources', 'ELIM-I Training Resources', 'Frequently Asked Questions', and 'Keep In Touch'. The main content area shows the 'ELIM-I Measure and Intervention Resources' section, with a green hand cursor pointing to the 'BBC Tiny Happy People Videos' link. Below this, a process flow diagram is shown, consisting of several steps: 'Step 1 Assessment Identify', 'Step 2 Conversation Explore', 'Support needed', 'Shared decision-making', 'Self-directed Resource: How to be a Super Communicator Booklet', and 'Signposting'. A yellow box above the diagram is labeled 'Step 3 Intervention' with the subtitle 'Supporting parent/carer to increase responsive contingent interaction'.

Accessing the ELIM-I Resources

On the page **ELIM-I Measure and Intervention Resources** you will find a series of drop-down sections which align to each step of the ELIM-I.

In each section you will find corresponding resources for families and practitioners (these will be highlighted blue).

Click to download copies of the resources

The screenshot shows a web page titled "Resources" with a navigation menu. The menu items are: "Preparation for families", "Step 1: Assessment", "Step 2: Conversation", "Outcome", "Step 3: Intervention", and "Review". The "Step 1: Assessment" item is selected and highlighted in blue, with a green hand cursor pointing to it. Below the menu, there is a section titled "Assessment resources:" with two links: "ELIM-I Measure" (circled in red) and "ELIM-I Guidance Handbook".

Resources

- + Preparation for families
- **Step 1: Assessment**
- + Step 2: Conversation
- + Outcome
- + Step 3: Intervention
- + Review

The ELIM-I measure will provide an indication as to whether the child may have a speech, language and/or communication need. Early identification aims to ensure that no child's needs are 'missed' or go undetected. The ELIM-I measure should be completed with the parent/carer during the review, allowing practitioners to support any questions or concerns the parent/carer may have.

The measure should be used in conjunction with the guidance handbook.

Assessment resources:

- ELIM-I Measure
- ELIM-I Guidance Handbook

Printing Resources

You may also print hard copies of the materials, and this is recommended for resources that will be used with families to support engagement

To support teams to order hard copies from print services we have included information about **Printing Specifications**

Early Language Identification Measure- Intervention

ELIM-I Talking 2gether: Collaborative model of ELIM-I Development Projects, Reports and Publications Contact

- ELIM-I Measure and Intervention Resources
- BBC Tiny Happy People Videos
- Printing Specifications**
- ELIM-I Training Resources
- Frequently Asked Questions
- Keep In Touch

Printing Specifications

We recommend that where possible, HV teams using the ELIM-I resources with families provide hard-copies of the Universal and Targeted booklet for parents, and practitioners use hard-copies of the Goal Setting Cards for shared-decision making with Targeted families.

To support ease of printing we have provided a printing specification for each resource below.

Resource	Specification	Binding
Universal Talking Together Booklet	10 page A5 (200gsm Silk, 350gsm Silk cover)	Stapled
Targeted How to Be a Super Communicator Booklet	40 page A5 (200gsm Silk, 350gsm Silk cover)	Stapled
