

They bought a kit to make beer
She bought herself a new dress
They walked into the trap
There are a lot of people outside
Jason wanted the Golden Fleece
He cut the piece of twine
There are four horses in the field
They had a goat on their farm
They didn't have a good start in life
I suppose they are happy now
She's learning how to dance
They have a new water supply
The rail track is overgrown
You will have to run for the bus
The whole floor is wet
He used to strut about town
It's just his style
She put on a brave face
We took another path
They realised the problem
You should go soft on him
They are the pride of the nation
The choice was the right one
The force of the wind increased
The prison term was quite long
They were eating out of the palm of her hand
Put a comma after that word
I think it's time to go
There are two of them here
The rail track was overgrown
There's a gap in the field
He was talking about his wife
That wasn't very fair
It's just his style
He put his foot in it
Spare a thought for your parents
The price has gone up again
The city is at the mouth of the river
It's near the modern station, down by the town square
The film should start soon
There's a letter for you today
Now breathe in slowly please
She said she was coming
My back is very sore lately
He put his cap on
She took her shoes off

Don't start on me now
The goal was from a free
We haven't any time
They bought a new bath last week
They kept a goose in the back yard
The linen cloth was crumpled
The choice is the right one
There's a cure for that now
He's travelling up North
Ask the other nurse for water
I think it's time to go
She'd like to go for a dip
Are they ready now?
Will you get another chance?
Take a look at the car
Put his cap on
Which one do you mean?
We live in Northern Ireland
All of us are Irish
